Fleeing rumors and (entirely legitimate) accusations of criminal arson, Lost and company leave the kingdom of Glace and begin their journey to Dalbe, the kingdom of Summer.

In addition to being an inadvertent arsonist, Lost's actions have drawn hostility from other parties both inside and outside the game. Lucas Lee, a billionaire tycoon blames Lost for his daughter's amnesia while the insane guild leader Chronix doubles down on his quest for vengeance. In the midst of all this conflict while being constantly pulled in all directions by these myriad parties, Lost is simply trying to find a method that could free his sisters from his Aunt's oversight and finally return them to his care.

In the midst of all this strife, Lost has to manage the increasingly frequent migraines associated with using his preternatural speed. Disregarding these conflicts and worries about his own health, however, Lost simply desires to find a method that could free his sisters from his Aunt's oversight and finally return them to his care.

### **G M Lawrence says**

#### **Good LITRPG**

Good series to read to pass the time. A good set up but you for got to say what his stats are.

---

### **Lazybee says**

Light read. Pleasant enough although plot gets a bit complicated at times with teen romance.

---

### **Alexander Collas says**

This one stepped up the story line greatly and really started to draw you in. He said in the preface there will be 12 he thinks. He needs to get writing I am running out. Great job Wolfin.
