This book is so beautiful, in so many ways. The author has adorable illustrations on every page, and the mini biographies of these amazing women are just enough to pique your curiosity. Thankfully, she's added lots of different kind of resources at the back - I found myself looking in to quite a few of these remarkable stories. HIGHLY recommend for females of all ages - Inspirational.

Ariel Jensen says

Absolutely wonderful. Straightforward, interesting, educational. A tiny book filled with unbelievable and remarkable stories. Each mini-biography is accompanied by an adorable illustrated portrait. Inspiring in every way.

This is the follow up to Little Dreamers: Bold Women in Black History. An excellent collection for young readers to get inspired by learning about incredible women from all over the world

Sara Lenahan says

This book shines a light on women who may not be known for their contributions to the world. Highlighting the importance of women in society encourages other little leaders do that same thing! This book explores women of all colors.

It's so important to teach young people about the less acknowledged, females who had an impact on the way we live our everyday lives! The illustrations are kid friendly and colorful. The sentences are short and make these people accessible to the really young.

Other books you might pair with/connect to are "Little Leaders: Visionary Black Women" and "Dream Big Little One"

This book would be used to teach women's rights and the importance of hidden figures that do not get the credit they deserve. "Often it took a long time for others to understand them or the value of their efforts"

Another excellent entry in this series. Easy to read and incredibly informative about the women that contributed to their respective fields. Bravo, Ms. Harrison!

Lenoire says

This beautifully illustrated book features true stories of 40 women creators all over the world. The women featured ranges from inventors, artists, scientists, and writers who inspire and educates people. The book includes the famous architect Zaha Hadid, actor Hedy Lamar, physicist Chien-Shiung Wu, and many others.

The book was artistically done and written beautifully. I found the book to be inspiring and enjoyable to read. However, I found the book to focus a lot on women who had an impact on the arts and creative fields. I would have loved to read more about women who made an impact in the STEM field. Overall, a good book for young girls to let them know everything is possible. And, I found it a good read for any adult who needs a bit of inspiration in their life.

I love this follow up to Little Leaders. The artwork is beautiful and I really like that the people selected go beyond the typical ones found in this kind of book.

I received an ARC from the publisher in exchange for an honest review. My thoughts and opinions are my own. Any quotes I use are from an unpublished copy and may not reflect the finished product.

Little Dreamers: Visionary Women Around the World was beautifully written with amazing illustrations! It was only after starting this post that I realized all of the women have their eyes closed. I wonder if there's a reason or significance for that? Regardless, the illustrations really complemented the information being shared about each woman.

Like with the other book, most of these women were unfamiliar. I think I actually preferred not knowing anyone, because it made for an even more enjoyable learning experience. This one is meant for younger readers, which is why I think my son paid closer attention to this one. Vashti Harrison was able to condense the information about each individual woman and present it in a way that was both informative and interesting.

I believe books like this are really important, and I'm happy that they are going to be out in the world. I want my children to know that they have the potential and the ability to do great things, and that their gender doesn't matter. It's books like this that give me hope for a better future for my children.

A richly illustrated beautiful book highlighting women who have made their mark in the world in big ways. The book features 36 full page biographies and 18 half page biographies. Very child friendly and easy to

read.

Sara says

Wonderful! I met so many new and incredible women whose contributions to history, art, and science were previously unknown to me. Thank you Vashti Harrison for these beautiful and concise biographies that teach so much!
