Full Circle: From doodles to discovery- 101 drawings to finish (Volume 1) Katja Vartiainen

Want to draw, but don't know how to start? You love doodling on the phone but need inspiration? Your child is full of energy with a pen in her/his hand but that first line is always so difficult to make? Full Circle offers you less talk and 201 no nonsense doodles to discover and finish the way you want to. For children from 8 years old up to adults, these sketches offer an easy-approach starting point to get you drawing. You can challenge yourself by turning the page sideways or upside down. You can draw first, then you can continue by coloring your work. 'Full Circle' is Volume I in a series 'From Doodles to Discovery' and it allows you to just get on with it and nourish the creative flame flickering inside you.

Deb says

I received this book in a giveaway. Perhaps I have misunderstood the concept but each page contains a squiggle or two. The intent is to finish the squiggles into whatever drawing they inspired. I get that the adult coloring for stress relief is popular right now and that this is an offshoot of that concept. It's just not for me. If a line or two on a page were enough to spur the imagination, would the artist need any prompt at all? Wouldn't a blank page suffice? Kudos to the author for imagining adult creativity beyond coloring but I couldn't imagine purchasing this book.

Sara Angelo says

This doodle book really brings out the creative process. Even if you don't have a artistic bone in your body, it gives you a few pieces of the puzzle to create your own, unique picture. Great idea!

Jennifer Kirkwood (Levac) says

I received a copy of this book in exchange for an honest review. Please see original review on Genuinejenn.com with pictures.

My daughter loves to draw and colour so I knew she would love to check out this book. The book has a 101 started drawings that the reader/artist can finish how ever they see fit. Then the can leave them as is or colour them. There is a wide variety of pictures to draw and can take the imagination all over the place. Some of spaceships, people, animals, country settings so much to draw. This is great for all ages, the author recommends 8+ and my daughter is 8, she enjoys it a lot. This is especially great for people who would like to start drawing but don't know how to get started or just fun like writing prompts but it is a drawing prompt.

My daughter and I give this book a 5 star!

Aletha Pagett says

I received this book trough Goodreads and just can't decide what to do. Shall I keep it for my non-artistic self, shall I take it to church to engage wiggly children or shall I give it for a Christmas present? What fun!

Ana Meyer says

So nothing to read in this book just to explore. I am not much of a doodler so I tested this book out on some

unsuspecting teenagers. I gave them all the same page from the book and told them to finish the drawings. Once done I had them all group up and compare what they created. They all had different drawings. It was a great way to help them understand perspective. That they all started with the same paper but saw very different things when it came time to develop the material. I don't think the artist intended for this to be a therapy tool but it is and it worked. I also gave some of the other pages to some teens with busy hands (ie they need something to do all the time) and they loved it. Several spent over an hour working on different pages. If you love to doodle this book is a great time to be had. Let your creative juices flow :)

Vernita says

If you're sailing on the sea or just relaxing at the park, you're going to enjoy Katja's "Full Circle" Drawings ~ Certainly, your child will be able to go on an adventurous journey and put their curiosity to work.

In each drawing, they will be able to use their imagination to create their own unique "Art Masterpiece"; whether as an Abstract drawing, a landscaping, or wherever their mind wanders. And since Art is an intricate part of a child's/youth's education, this collection of drawings will be well worth a parent's/school's investment. Well Done Katja!

★★★??½

I received a complimentary copy of the book in exchange for my honest review.

3 & 1/2 stars. Rounded up.

This book is so perfect to just relax with some music and doodle to. It's great for working on your mindfulness and I love that it wasn't just blank pages staring me down, daring me to try and make good art. Ugh. Instead this book is filled with started art. As someone who doesn't believe in her art abilities compared to that of my siblings, this was great for me and relieved the pressure put on me (by myself of course *eye-roll* lol) to be good, and let me just have a good time.

As soon as I got the book in the mail today, I finished 3-4 drawings and wasn't going to stop on this boring saturday until I remembered I was gonna review it after I gave it a try. Oopsie.! Welp, review's up. Now back to some doodling.!

Marian Thornley says

Do you find yourself doodling while on the phone or thinking? Fancy developing that talent and stimulating a different part of your brain, a different creative avenue? It is now well known that art is an effective therapy and stress-beater, as proven by the recent plethora of doodle books and mandala colouring books. This book, by artist Katja Vartiainen, offers a kick start to your own art work. Each page has the suggestion of a drawing but that drawing - to be completed by you - could go in a million different directions. I am

going to keep this book next to my computer, to doodle in while thinking or even just day-dreaming.
