

# STOPPING KIDNEY DISEASE

A science based treatment plan to use your doctor,  
drugs, diet and exercise to slow or stop the progression  
of incurable kidney disease

**You will learn how to:**

- Eliminate factors/conditions that increase disease progression and mortality rates.
- Add factors/conditions that slow disease progression and reduce mortality rates.
- Reduce the workload on your kidneys so they last longer.
- Live longer and better using the most up to date treatments.

## Stopping Kidney Disease: A Science Based Treatment Plan to Use Your Doctor, Drugs, Diet and Exercise to Slow or Stop the Progression of Incurable Kidney Disease Lee Hull

*Stopping Kidney Disease* is the most comprehensive guide to understanding how your kidneys work and how to make your remaining kidney function last as long as possible. The book includes over 500 pages with hundreds of medical studies to document each part of the diet and treatment plan. The website is [www.stoppingkidneydisease.com](http://www.stoppingkidneydisease.com).

As a patient trying to cure an incurable kidney disease, Lee Hull was not allowed access to a potential life-saving treatment when other patients had access to the same medicine/supplement. He found that outcomes for a kidney patient vary widely dependent on the country and even state you live in. Lee was able to put his kidney disease in remission by using the treatment plan and diet in *Stopping Kidney Disease*. He decided to write this book and share what he has learned after living successfully with incurable kidney disease for over twenty years.

Lee believes everyone deserves the right to try and stop an incurable disease regardless of where you live or your net worth. The project Kidneyhood.org is trying to provide education and innovation to help kidney patients worldwide slow the progression of their disease.

**Susan says**

For the average person, the scientific abstracts are overwhelming. Way too much information . Just tell the reader what to eat and what other changes need to be made.
