The Blue Goblin Donna Pisella

Follow the journey of a grumpy green goblin who loves his green wriggly worms but turns the color blue after eating blueberries he finds in the forest. In his quest to change back, he discovers new delicious and nutritious green vegetables that leave him feeling happier and more satisfied. The goblin is no longer grumpy and instead of being scary to children, he finds happiness planting a green vegetable garden and feasts with his goblin friends.

My daughter has read this book twice since getting it a couple weeks ago. I, of course, don't know what it's about so I can't leave a review on that but I can say that my 7-year-old loves it. She also thought it was extra special because it was signed! Thanks so much for hosting the giveaway :)

My little boy loved the illustrations in this book. It is brightly coloured and eye catching. I read the book to him before bedtime and the goblin character really makes him giggle, although he is a bit too young yet to fully understand the theme that trying healthy foods can be fun and exciting.
