*Sometimes a man needs help learning to be a dad. That's what the Daddy school is all about.*

Architect Levi Holt plans houses - for other people's families. He's a live-alone bachelor. Or he was. When his favorite sister leaves him her infant son, Levi can't refuse. He has no experience caring for children let alone infants, but if parenting stumps him, he can enroll in the Daddy School to acquire whatever skills he needs.

Enter Corinne Lanier, sent by her boss to check out the house design he commissioned from Levi. She lives alone, too. And that's how she wants it - until she falls for Levi and his young nephew.

Why do things get so difficult just when Levi figures out how to be a father and finds a woman he adores? Just when Corinne trusts in Love again - love for Levi and for his sweet baby boy.

### **Mary says**

Although I did like the story line, in general, as I have others from this series, two things really annoyed me about this book. First there was little activity or sustained dialogue in comparison to all the pages and pages of introspective thoughts by the main characters. Boring! In addition, the pages of underlined print were so annoying. What did that indicate? I have no idea, and so I skimmed them just to get through it. The italics for the baby's inner thoughts was alright but that's it. Please no more underlining!!

I liked it, though I would not be claiming it as, "OMG AMAZING BOOK EVER!" It's a story about a single lady (I forgot her name) who was sent to a man to negotiate over the architecture of her boss's house. The man is the architect, but was going through a hardship in his life, hence compromising his career with his "impromptu" parenting. His sister died, leaving her baby to her brother to look after him. When the lady came to meet him, that's when everything changed for her. Upon seeing the baby in his uncle's arms, her maternal instincts started kicking in and she was unable to revert back to her old usual self when she was slowly, but strongly, drawn to being a mother to the baby.

It's good, though I honestly don't think the title is fitting for the story itself.

You be the judge.

#### **Good book**

I loved this book I wanted more. I will read all of Judith's other books. Very good read, it flowed easily and kept my interest.

bad book!!!.really ,i couldn't even finish half the book.too boring.  
unwanted characters are explained a lot in this book.  
seriously the worst book i have ever read in harlequin romance.  
usually i try to reach the end of a book even if it is not interesting. Here i didn't even bother to.... finish half the book.
