Pro-Love Cassia Leo

The hilarious conclusion to the *Anti-Romance* duet from *New York Times* bestselling author Cassia Leo.

Laney Hill is dead.

Well, not literally. Actually, death might be an improvement from her current situation.

After a disastrous day in London, Laney is forced to introduce her best friend George—who just confessed his undying love for her—to her latest fling, hot musician Kade Masters.

“By the way, guys, I think you both work for the same company.”

Yes, that went over well. Knowing George is the one who approves his royalty checks turns Kade into a sexy green-eyed monster. Seeing Kade is as serious about Laney as he is, forces George to up his game with some outrageous romantic gestures.

What starts out as an amusing competition for Laney’s heart, turns into an all out war between the two men. But Laney is not impressed. It seems the winner of this war may be the loser she’s been waiting for.

Kai says

I'm kind of annoyed here. How does this book have a 2 star average when it hasn't been released yet?

She changed the release date...get over it. I've been anticipating this book as well but I would never give an author a negative rating on a piece of work I haven't experienced.

I'll give Cassia 5 stars on this one just on principle alone. I already know this will be good based on the first installment.
