I've read my share of children's books and I try to keep that in mind while reading, but this was just so horrible. This book was probably the worst experience I've had in a while.

First of all, Vlad the Impaler was NOT a nice guy. Impaler isn't just a casual title. And yet he's portrayed as "a little rough around the edges". Yeah, ok.

It bothers me how dumb all of the characters are. Logan is supposed to be a bodyguard and yet he constantly endangers them and lets them sneak around and get into trouble. And if Morgan was working with them the whole time, why would she attack their plane?

Also, Max's mom needs some meds. And where is she for the rest of the book? Her son is in a whole other country for Christmas and she doesn't call once? No, that totally makes sense.

Minor annoyances: I'm tired of hearing how rich Max's dad is. I want to rip Natalia's stupid handy dandy notebook to shreds. And PLEASE. People don't need to be so dang vague all of the time... If these people are supposed to be working with these kids, why don't they just explain things to them? You'd think they'd try this considering their age. I just really hated this book.

One of the first series i actually enjoyed reading.

This is the second of a fantasy-adventure trilogy that I found on the shop-soiled table at my neighbourhood bookstore and picked up after reading the blurb. The setting in a Scottish Castle was what drew me. The series features four American eleven-year-olds, Max Sumner and pals Natalia Romonov, Ernie Tweenie, and Harvey Eisenstein from Avalon Minnesota, the four together forming the "Grey Griffins" who have previously been involved in an adventure in which one of their schoolmates turned into a monster (with scales and horns). Max is the custodian of the magical Codex which helps him battle monsters and evil faeries from the realm of Oberon and aiding Morgan La Fay, who is trying to gain power over the world. In this instalment, the children are invited by Max's father Lord Sumner to spend Christmas at Sumner Castle but even before they've got there, they're attacked by Kobolds (a type of goblin but viler). At the Castle they are pulled into further adventure with a prophecy surrounding Max and Morgan and her hench-people attempting to get their hands on the powerful Spear of Ragnarok. Battling monsters and travelling through magical portals, even meeting Vlad Dracul, our young adventurers must face all forms of danger in fighting Morgan and rescuing Max's father who gets kidnapped along the way.

It took me a while to get into this book as the first part dwells a bit on their previous adventure without

telling one enough to see how the present one connects but once the children get to Scotland, it got a little more interesting for me. Perhaps if I'd read book 1 first, it would have made more sense, but still throughout one isn't really clear as to what adventures befell the children before this, even the prophecy aspect being brought up only somewhere down the line. It wasn't even clear whether it was mentioned in book 1 because Max himself seems not to have heard of it. The adventure itself was interesting enough, the authors combining Arthurian legends and those of the Knights Templar and adding in a good dose of fairy folk and magic. Again there were some elements which felt very Harry Potterish. The book was quite readable but I never felt like I was "into" the story – instead that I hadn't really "got" all of it. The characters were likeable but some things about each of them annoyed me a bit as well. So just an ok read for me.

The second in the fantastical world of the GREY GRIFFINS. Max, Harley, Natalia, and Ernie, recovering from their adventures in the first book of this series, THE REVENGE OF THE SHADOW KING, are invited to visit Max's father for Christmas in his wonderful castles in the Scottish Highlands. Little do they realize that nothing is as it seems.

Drawn further into the world of the Templars, fairies, and creatures dark and light, the four friends must overcome the ever increasing dangers that they have been facing and now are menaced by the Black Wolf Society whose mission, it seems, is to recover the Spear of Ragnarok which will be used to destroy the tree of worlds and bring humanity to an end. To these ends, they have taken Max's father captive and threaten his life if the tweens refuse to help them in their mission.

Max makes it his sole purpose to save his father and goes in search of the Spear.

What follows is both exciting and terrifying and will keep the reader fascinated and enthralled for hours as they lose themselves in the worlds of the fantastical.

I'm really glad I was able to read this equal. I enjoyed the first book so much and have been wanting to revisit the world again, but it was easier for me to find other books and read them instead. Loved it.

THIS BOOK IS AWESOME. IF YOU LIKE FANTASY, YOU GOT TO READ IT! Only thing I thought bad was it was shorter than the first one... But anyway, the book actually had a lot of happy moments for the main characters, some sad moments, few questions resolved, and a lot of new questions storm in the readers' heads, which makes the reader really want to read the next book. I felt really bad for a lot of the characters, like Vlad, Ernie, Max, and a lot of other people. I have so much questions to ask about what's going to happen next. I felt that Ernie didn't take too much part in the 1st book, but now he's even more involved, which I really like. The powers that were unleashed from Max was so extraordinary, and it kept blown in my head.

I loved this book it was a great follow-up to the series.

This would be good for people who have read the rest of the series.

This book is the second of the Grey Griffins series, I would have written a review of the first book but I kinda forgot most of the stuff that happened, but in this one I kinda remember most of the things. One thing that I remember when I first read this book was that it was actually good and was able to catch my attention. Well, I'm not much of a reader so if a book is able to catch my attention then it must be good. I even reread this book a bit to remind myself about the story line and the book itself. I remembered how I first got into this book. This book was filled with adventure, mystery and excitement. Through every page, I just got even more sucked in. Another thing I remember, was that this book was kinda better than the first one. I gotta admit though, this one was kind of almost exactly the same as the first one, not really much have changed besides the story line. But why would you want to change something that is already good, I guess... So if you are into these type of books that are adventurous and mysterious, then this is the book for you.

Chris says

When I read the first Grey Griffins book, The Revenge of the Shadow King, I found it very fun but had mixed feelings about its quality as an actual book. There were many random action events that seemed to come out of nowhere, and many plot elements I felt went underused. On the positive side, I really liked the character interactions and some of the characterizations - at least for Max and Natalia, as Ernie and Harley were underdeveloped.

The sequel deals with all of those complaints, while keeping the strengths from the first book. Right in the first chapter, we learn some of Ernie and Harley's background, and the two are further developed throughout the book, particularly Ernie, who plays some surprisingly important roles.

The action picks up very quickly. I won't spoil what happens, but I will say that this time, there's far fewer random elements and much more things that connect together, with a more cohesive overall plot, and many surprises. I was genuinely surprised and impressed.

Natalia retains her inquisitive demeanor and love of snooping. Max is, like before, more interested in being with friends and family than he is with his family's massive wealth. His personal problems are explored in greater detail than anyone else's backstory, as he is the primary main character after all.

The story does follow roughly the same formula as the previous. The four friends go on adventures, get rescued by adults, have some backstory dumped on them (there's one entire chapter that's mostly dialog and backstory, with no action), and the final adventure involves the kids going at it alone. Only this time, the formula has been tweaked to near perfection. There's more logical reasons for why these things happen, and it just feels more designed and well thought out.

If this is a sign of things to come, this series could well pick up. The series' trademarks - lots of friendly banter between the kids, plot dumping in the form of dialog from adult mentors, and lots of close calls - will probably remain consistent throughout. But as long as these trademarks are handled with care so that they form a well flowing narrative rather than a mixed bag, the result will be a lot of fun.

In the story *The Rise Of The Black Wolf* a group of kids go on an amazing adventure, and end up facing Fireball Fairies, Wolves, and an Evil Witch. The authors of *The Rise of The Black Wolf* tell about great adventures and challenges as well as relating their story to how to react in real life situations. One of the weaknesses I noticed about the book is that its text is a little too easy, it doesn't use many descriptive words/ it doesn't use the text in any challenging ways. For example where you think they are going to use a certain word that would make you even more interested they use a less descriptive word than expected. This book is part of a series, although I have not read them. I would recommend the book series for mostly younger readers, although I for one find that the book is kind of cool because I love fiction. I think that overall this book is amazing, and I think that anyone who likes fiction will enjoy *The Rise of The Black Wolf*.

The Rise of The Black Wolf

This story takes place in a town in Minnesota called Avalon. There is a group of kids that call themselves the Grey Griffins. The leader of the Grey Griffins is Max. Max's parents are billionaires. One of Max's ancestors is King Arthur. Max now protects a magical book. Max's dad invites him to Scotland where he lives. Will Max say yes or will he say no? If Max goes has something changed? Will Max get blindsided by his own father?

This book is a sequel to *The Revenge of the Shadow King*. Which is written by Derek Benz. This quote will tell you if you want this book or not. Those kind of houses were known to have their own particular sounds, but they didn't but they didn't compare with the mysterious noises produced by a place like Castle Sumner that was well over five hundred years old. This quote can be found on page #165. I would recommend this book to a 6th-7th grader. This book is a fascinating fantasy book with some action and mystery. I like personally

like this book and I have yet to read the trilogy. I think you will like this book and read it yourself.

The Rise of the Black Wolf

After banishing the Shadow King, the Grey Griffins relax a little as their life begins to return to normal. As the holidays draw near, Max as well as the rest of the Grey Griffins are invited to spend the holidays with Max's father in Scotland. But throughout their stay terrible things begin to happen once again and Max's father gets taken. After the Grey Griffins fight for their lives to gain all pieces of the spear of Ragnarok, they learn the terrible truth about Max's father.

One theme from this book is that teamwork is key. While the Grey Griffins are solving the puzzles for the spear of Ragnarok, there is a point where one of the members named Ernie, becomes very terrified and doesn't want to continue because he is afraid he will mess something up. But his friends quickly change his mind after saying "We need you Ernie! We wouldn't have gotten this far without you and the Grey Griffins must stick together." Another theme is to not judge someone before getting to know them. The Grey Griffins journey eventually carries them to the graveyard containing Dracula and right away the Griffins are terrified. But later as the dangerous Black Wolves draw near, Dracula says "you must go through the portal. I will stay and hold them off. You must fulfill the prophecy." which illustrates the Grey Griffins may have been too quick to judge.

The population I think who would enjoy reading this book would be anyone who loves adventure, suspense, and fantasy. The reason I believe this is because in a way this book is like The Hunger Games and I know people love those books. It is filled with twists and surprises and will make you want to read more.

Koblerevan says

This book is an okay book for anyone who has read the first book. This book kind of made mad. I liked the first book. This one kind of died down in my opinion. That is why I have decided to not read the last one.

The first forty pages were pretty boring and didn't have much "pizaz".

This book was about Max and his friends going to Scotland to visit Max's dad who in which he has not seen in around nine years. Max has another foe to take care of, the black wolf. On Max's quest he meets new friends.

Some questions I still have is; What will happen in the next book? What will Max have to face?

A tantalizing tidbit was; The fireball pixie had a short temper. Her bursts of flames were intimidating. When we saw the wolves being attacked by the little creature, it surprised us. The pixie seemed to have it all under control.

This book didn't have as many suspenseful moments as the last one. Maybe someday I'll read the other books. Just saying that you shouldn't be surprised if I don't. Some people wouldn't agree with me and that's fine, but I'm not changing my mind. If you are going to read this book, make sure to read "The Revenge of

the Shadow King first."
