The Whispering Room Amanda Stevens

Work is a welcome refuge for New Orleans homicide detective Evangeline Theroux. Feeling suffocated by her new baby, in whose eyes she sees only her dead husband, she throws herself into a high-profile murder case.

Reclusive writer Lena Saunders offers Evangeline a provocative theory about the crime: it is the work of a lunatic vigilante. Lena spins the sordid story of Ruth and Rebecca Lemay, whose mother brutally murdered her male children in an insane effort to root out an "evil" gene. The girls survived and grew to adulthood--but one is carrying on her mother's grisly work.

When the case takes a terrifyingly personal turn, Evangeline's whole life will depend on a crucial, impossible choice: the lesser of two evils...

This is a creepy mystery. Evangeline Theroux lost her husband recently and her new case takes her closer to finding out what actually happened to him. The FBI has also taken an interest in her husbands case and keeping Evangeline out of it may be harder than they think.

It seems that the new deaths are pointing to an old case of a woman who killed her male children thinking to put an end to what she thought of as an evil gene that ran through her husbands blood line. Her daughters helped her with killing her family and hiding the new baby her mother had. Finding that child may be the missing piece to the puzzle of what is happening .

Set in New Orleans, LA the thick swampy air and heavy mystery of spirituality and voodoo give this book a creepy atmosphere that mixes well with the twisted tale. I'll never look at a paper crane the same way again after this book. Well written with a good amount of suspense and intrigue to keep you guessing.

The Whispering Room is a story of pure evil. Evil that is lurking around every corner which has now landed on the doorstep of Detective Evangeline Theroux's ("Evie") home.

Evie's a highly decorated detective with the New Orleans Police Department ("NOPD"). She's tough and smart and once she gets her hooks into something, she won't let go. As tough as she is, she's having difficulty dealing with the death of her husband, Johnny, a year ago. Johnny was also a detective with the NOPD and his murder was never solved. Evie has a lot on her plate. While trying to get the respect of her fellow officers and deal with her emotions about Johnny, she's trying, without success, to bond with her 5-month old son, J.D. On top of all this, she's just found out her parents are separating; she and her partner are in the midst of trying to solve a recent murder; and everywhere she turns the FBI just happens to be there. With all of this, Evie is waiting for the other shoe to drop which it does with a big thud. Strange things are occurring. Evie knows and feels something is not right and that it has entered her and her son's lives.

I have to say that with the bizarre murder case, the death of her husband and strange happenings, I really didn't think the story would end well. I was mistaken. Stevens wraps up the intertwining stories really well. The ending itself was one I didn't foresee.

Without being overly-descriptive, the author gives the readers a clear picture of the lush surroundings of New Orleans, making you feel like you're in the midst of what's going on. This is probably why I found it to be a bit creepy every so often while reading the book. Just thinking about it now makes me shudder.

This book is full of twists and turns. It's an easy read with a story that is fast-paced and relayed well. I highly recommend reading this book especially if you like mysteries and thrillers.

This was not at all what I expected it to be. Man, I was seriously suckered punch not realizing the rug was going to be snatched underneath me like this book. All for the sake of a strong belief of getting rid of the male population in this family dynamic.

I enjoyed the suspense, but the writing was definitely the most basic way to tell a story. At times, the clichés started bugging me. Like, trying to describe Evangeline's pain at losing her husband, or her love for her son. I wasn't convinced. Whatever - it was a fun read, a quick read, & I liked the twist.

Hillary Pincus says

I'm back at it! This was an enjoyable read. A few too many extra characters in my mind, but good twists to compensate. An easy 3.5 stars.

I am totally hooked on Amanda Stevens now. The Whispering Room was fantastic. Just when you think you have things figured out, you don't. I second guessed myself right to the very end.

I can't get over how fast I read this book! When I hear the term 'page-turner' I tend to scoff for the most part. Not many books do that for me, but this one fits the term to a honkin' big T! If I could have just stayed in one place and only read, I'd have finished it in a few hours. It was my bedside book, so I had to sleep or get up and function for the day and had to set it aside for the three nights/mornings it took.

I almost didn't let it stay my bedside book as the beginning is hyper-spooky, but I put on my brave big girl panties and stuck with it and glad I did since I get more reading time in my bedside books.

Evangeline Theroux is a detective with New Orleans Police Department. She is a widow after the death of her husband in the line of duty, a single mother to the baby who won't know his daddy. Evie is very good at her job and uses the high profile murder case she catches as a lifeline to haul herself out of the abyss.

Just as she starts to get an angle on the case, she yanked from it by the FBI, told that the line she is following will lead to disaster if she continues. She gets assistance from a reclusive writer with her own take on the murders. She says it's the work of a lunatic with her own agenda and Evangeline finds herself drawn in even after being removed from the case. It's become personal.

The characters are written so well that I could see them in my mind's eye and some of them scared the bejeezus out of me.

This is Amanda Steven's best of the three books I've read by her and I really was superbly enthralled with THE DOLLMAKER and THE DEVIL'S FOOTSTEPS.

Five spooky thriller New Orleans good beans.....

Review

New Orleans homicide detective Evangeline Theroux has hit a rough spot in her life. She is a widow after her husband Johnny Theroux, who was also a New Orleans police officer, was shot three times and killed in what appeared to be a drug hit.

She has a 5 month old baby who she feels disconnected from. Not that she's a bad mother. She's definitely not. She just feels that she hasn't done enough to earn the love of the precocious little boy and he looks too much like Johnny to get past the resemblance.

Evangeline is something of an outcast among her fellow officers. They find her to be a cold fish, cynical, tough, confident, and tenacious enough to earn the nickname Ghoul girl. What they don't understand, since they are mostly men, is that women have to work 100 percent harder than men on the job in order to earn any semblance of respect from their counterparts. She also has the highest clearance rate of any murder cop in the city.

Evie and her partner Mitchell Hebert end up with a bizarre case of a man who was killed by snake bites. Not just one or two, but numerous. The man was a high profile lawyer to a scum bag drug runner who we learn, has his hands in everything including corrupt Police Officers. If that wasn't enough to pique the interests of many people, Evie and Mitchell find out that the dead mans own brother was killed in a similar way; bitten by snakes.

Evie soon finds that her own life and as well that of her 5 year old son JD, has turned into a puzzle of its own. The FBI under Special Agent Declan Nash has been keeping an eye on Evie and tried to keep her away from the nefarious drug dealer to save her from the same fate that killed her husband. Soon thereafter, a strange man and blond woman are seen not only at her house, but at her mother's as well and someone continues to leave origami birds lying around for Evie to find.

After pulling Evie from the case, her captain Angelette Lapierre advises Evie that she needs to find time to speak to a true crime writer named Lena Saunders. Saunders claims that she may have the answers to who the real killer of Paul Courtland is, as well as answers to her husband's death but will only speak to Evie.

Lena spins a story about the Lemay family who 30 years ago, was left devastated after the mother, Mary Alice Lemay, killed her two young sons. Lena tells Evie about the two surviving sisters Rebecca and Ruth, who may have helped their mother kill their brothers because they contained the evil gene. There was another survivor to the nightmare; a little baby girl that was born at the same time Mary Alice was killing her two boys. If you connect the dots, you will find out almost immediately who the baby is, and why her own son has been targeted to be killed off.

Whispering Room transverses 30 years from the start of the book, to the final conclusion. It is the story of a mother's fight to save the life of her little boy from being just another victim of those who truly are sick and disturbed into believing there is a so called Evil Gene within their family. It is also the awakening of Evie to the discovery that her husband wasn't who she thought he was, and finding the means to move on with someone else to care about and love instead of reveling in self-pity.

I've always liked the setting of New Orleans for the background for any story. The city itself has a steep history that truly hasn't been fully explored enough in my opinion. The story takes place after Katrina came through New Orleans and forever changed the landscape and the people who lived there. It does take a shot at police corruption in New Orleans, but that is fact, not fiction as anyone who has read the news or has lived in Louisiana for any period of time is well aware of. It's the nature of the beast called Louisiana politics.

One thing, if you don't like snakes, and I don't mean just one, or two, but a whole shit load of snakes--you might want to keep the light on when you read this book otherwise you will find yourself looking under your couch, and bed, and everywhere else you might think to find a snake.

I've become a fan of Stevens writing after reading her solo works The Dollmaker, and The Devil's Footprints, as well as the Restorer an Urban fantasy novel which is the first book in the Graveyard Queen series. I look forward to reading the second book in the series called The Kingdom when it releases April 1, 2012.

I loved this one - all except for the snakes that is. This was my first book by Amanda Stevens but definitely won't be the last.

I always find the setting of the Louisiana Bayou to be creepy all by themselves, add a couple of crazed killers and voila a very good story.

If you hate snakes, this book is definitely a thriller. Evangeline Theroux is new mother, recently widowed, and a homicide detective with New Orleans P.D. She's thrown into a high profile case which she attempts to link with her husband's murder and ultimately winds up in the middle of a murder case some 30 years old. An absorbing page turner.

The Whispering Room by Amanda Stevens was a surprise. I didn't think I would like it, but I enjoyed it immensely. It starts out as a slow horror story but it doesn't rely on horror alone. It brings in a crime element and psychotic people. Evangeline, a new mom to DJ, is a police detective in New Orleans, who is still grieving her murdered husband Johnny. She's still searching for his killer when she's called to the grisly scene of murdered attorney Paul Churchill. When she and her partner Mitchell interview the widow they discover his brother died the exactly same way- snake bites. Venemous snakes bites. The FBI wants Evangeline off the case fearing she will hinder their investigation into a crime lord, Sonny Betts. FBI Agent Nash reveals her husband was a dirty cop in cahoots with Betts. They show her irrefutable proof. Evangeline is devastated. When DJ is kidnapped from her mother, leaving Lynette for dead (of snake bites). Evangeline rushes off for a shoe down with evil.

I can remember reading this author's debut novel, *The Dollmaker* when it first came out. I was hooked. I could not get my hands on the next book, *The Devil's Footprints* fast enough. Since then I have read a few other books by this author. When looking for a book to read recently I jumped at the chance to pick up this book that has been sitting on my to be read shelf for quite some time.

The story started out fine. It was building up to be a creepy thriller. I was ready to settle in and enjoy the ride. It became apparent pretty quickly that this was not going to be the case for me with this book. I hardly missed a beat when the bodies started piling up. Lena was good as she at least was able to put pieces together and connect the dots yet when the others did not I wanted to scream "How can you not SEE the connection". While this book was a downer for me, I will still check out more books by this author.

First line: “ *The swamp bustled with the sounds of a summer morning.*”

This particular book has been on my wish list/to be read shelf since 2009...so you can imagine how grateful I am to have finally gotten the chance to read it a whole 9 years later!

What an incredible novel! I had a lot of trouble putting it down so I would only begin to read when I got home from work in the evenings and would read until my eyes started closing!

I found New Orleans to be a very interesting setting for this novel...and I was especially terrified by all the talk of snakes (venomous or not)...but that wasn't even the real scary part. The scary part was hidden and you would fall upon it without fully realizing what was about to happen. I absolutely love that in a novel.

All in all, an amazing read, despite the 9 years waiting to get around to it!
