So, the copy I have has the original cover which made three or four people grin at me and make comments about old-school pulp sci-fi.

Not a bad story all told, a little silly and a couple of things sort of contradict themselves, but they're easily enough overlooked, so mostly it's worth reading.

synopsis:

selena has psychic abilities and has kept them hidden her whole life, because those with extra abilities are scorned on earth. she is imprisoned, and receives regular visits from mark, whom she thinks that she is in love with. when it comes time to her trial, she discovers that mark is the prosecutor, and she has told him everything. selena hates mark with everything in her, but mark is a spy, and has come to earth to round up any lingering psychics. he makes sure that selena is sent to the planet where everyone lives peacefully together. selena is tested, and given charge of the animals when it is discovered that she has an affinity with them. she contacts mark, and is blasted because she exposes him and his team to the earth troops. while selena is wallowing in her misery, a mysterious creature is captured, and selena immediately bonds with it. when the creature wants to take selena to its home planet, she goes, in spite of mark's protestations. selena learns and earns her great psychic power with the creatures, and the creatures in turn help the people of the planet when it is under attack from the humans.

what i liked: i liked the sci-fi aspect of the story, as well as mark and selena. selena was so closed off emotionally as well as psychically, that her bonding with mark was such a departure for her, and the pain she felt when she was "betrayed" several times was truely heartfelt. selena's connection with the animals was nice.

what i didn't like: the feeling that the psychic abilities were part of a game. you reached this ability plateau and then had to level up.

Eden Glenn says

I enjoyed this early work of Ann Maxwell. It was sci fi with romantic elements. The characters were well developed and the world unique.

Karen Easley says

I loved the characters, especially the aliens..I just wished she wrote a squeal to this book, it ends leaving you wonder what happened later...I have reread at least 5 times now and it never gets old....

Dantegideon says

Good in parts, tremendously cliched in others.

Jillern says

One of my favorite books when I was growing up...still love it.
