## **Leopard Enchanted** Doranna Durgin

Her Sworn Enemy... Or Her Fearless Protector?

Spy Ana Dikau is gathering information about technician Ian Scott – a Sentinel who takes the form of a snow leopard. But Ana doesn't realise that the amulet she carries will slowly kill every Sentinel she comes into contact with – and by the time they realise an epidemic has crept over the Sentinels.

Now the only way for Ian to save his people from the deadly epidemic is to form a truce with Ana. But their unlikely partnership is complicated by the fact that Ian cannot help desiring the woman he's meant to despise...

# From Reader Review Leopard Enchanted for online ebook

## Harlequin Books says

"The next installment of the Sentinel series is just as exciting as the first. Ian is a sexy Sentinel beast who readers will love, and while Ana is lost in the beginning and inadvertently hurts Ian, she redeems herself by helping to save him in the end, making for an emotionally satisfying read" (RT Book Reviews, 4 stars).

---

## Eva Millien says

They are on opposite sides but the only way for them to survive is to form a truce but their unlikely partnership is complicated by their desires in this thrilling paranormal romance. If you have read the previous Sentinels stories then you already have a great appreciation for the interesting elements, intriguing master plot and compelling, sexy characters that this fascinating world is comprised of and you know that Ian deserves some romance in his life but let me warn you that his story is will keep you edge until the very end. If you haven't read the previous book then you could still enjoy Ana and Ian's story and be able to pick up on the overall plot but you would be missing out on a lot of information and world building that makes the master plot so much more. Anyway, once again the Sentinels keep me glued to the pages and I can't wait to find out what happens next.

## Cathy Beckett says

What happens when an Atrum Core spy meets a Southwest Brevis Sentinel? Sparks fly. Ana Dikau is a spy for the Core. It is her mission to meet Ian Scott and plant spy amulets within the walls of the Brevis retreat. She completes her mission but is unaware that the amulets are also set to kill everyone living at the retreat. She is also unaware of the fact that she has Sentinel blood running through her veins. Ian is on a forced leave of absence due to burnout from his job as an amulet technician at the Brevis lab and think tank. His job--to figure out how to detect and disarm silent working amulets.

This is the eighth book in Durgin's Sentinel series. I actually gave this book a 3.75 out of 5.0 rating. The only reason I didn't give it a 4.0 was because it dragged in places.

---

## Amelia says

The beings known as Sentinels have been clashing with another group of individuals called the Atrum Core for a very long time, and it appears their conflict is definitely not over in the eighth book of the series. In each story about the Sentinels, the premise has been extremely unique with a spirited couple. The newest release brings danger to the group who watches over the southwest region, and it is up to one of its members to stop the threat or all may be doomed. When an enemy is able to get close to the man who is diligently

looking for a solution to the Sentinels problem, their choices can either lead to them having a bright future or cut it short. The clever imagination of Doranna Durgin creates a paranormal story that is totally fascinating all the way through. SENTINELS: LEOPARD ENCHANTED intrigues with inventive details plus distinctive characters.

Being a technician for the Sentinels makes Ian Scott proud, especially when he can help save lives. However, his current project is causing him much aggravation, because he has failed to think up a way to guard those like himself from the amulets developed by their enemy, the Atrum Core. Though his foes are not supposed to cause any type of problems for his group, it has not stopped them from covertly trying. Frustrated because he cannot safeguard those who are protectors of the earth, Ian needs an outlet for his pent-up worrying. When he meets Ana Dikau, he believes she might be able take his mind off any troubles, at least for a short spell.

As a member of the Atrum Core plus being a woman, Ana has never been shown respect. In order to prove her worth, she has accepted an assignment to interact with Ian and secretly put an amulet in the place where he is staying. Though she has been taught to be very afraid of this man who can shapeshift into a snow leopard, she finds him to be considerate and enjoys being with him. What Ana does not realize is that the people with whom she works are much more devious than she knows, putting her and all the Sentinels in danger.

Originality is a word frequently associated with the Sentinels series. From innovative threats to unusual abilities, Doranna Durgin always comes up with something atypical to incorporate into the story. Creativity in every situation makes SENTINELS: LEOPARD ENCHANTED particularly enthralling. The series often has me wondering about the possibility of hidden groups fighting each other, and how humanity could be in serious trouble if the wrong one wins. In this book, only certain individuals are facing jeopardy but the risk to others is high if the Atrum Core succeeds. Ms. Durgin certainly added lots of suspense to the story with all the nonstop risks from the beginning.

When it comes to heroes, some are undeniably alpha while others have more beta traits. Ian possesses the best of both, making him someone I truly loved regardless of whether his take charge attitude was showing or it was his compassionate side being demonstrated. Ana has been taught to not trust any Sentinel, yet the protective nature of Ian makes her feel special for the first time in her life. Though sex between them starts off casual, it quickly turns into much more for both of them. When her deception is exposed, plenty of emotional scenes follow. During the story, a large number of previous characters make an appearance to my delight. With even more adversaries surfacing to challenge the Sentinels, the next book should be doubly exciting. SENTINELS: LEOPARD ENCHANTED captivates with ground-breaking adventures.

## **Melindeeloo says**

Leopard Enchantment starts off with a nice amount of intensity to the attraction between Sentinel Ian Scott and Ana Daiku who is a newbie spy for the enemy. I like enemies to lovers stories, but that trope is fairly subtle here since Ian doesn't know that Ana is the enemy and Ana is very sweet and isn't so wrapped up in the propaganda of her 'people' that she can't help but liking Ian and the other Sentinels that she interacts with - so the 'betrayal' when Ana is outed - and the consequences of that- is the big conflict for the pair.

I have been reading the Sentinels since their 'Nocturne' days and I am still hooked on the series. I really liked this pairing. I loved Ian in all of his borderline geekiness and Ana was very likable and I thought it was great that she quickly finds her own strength when she finds out how she's been manipulated by her handler. It was also fun to get some brief cameos of past stars. Now I am wondering how the introduction of a third faction to the ongoing battle between the Sentinels and the Core is going to affect future books. Can't wait to find out.

### **Stephanie G says**

They are on opposite sides but the only way for them to survive is to form a truce but their unlikely partnership is complicated by their desires in this thrilling paranormal romance.

Ana Dikau was sent to gather information, little did she know that not everything is as she's been taught and the reader can't help but get caught up in the story as Ian and Ana fight to stay alive long enough to save the others. There is undeniably hot chemistry between Ana and Ian but the relationship is hampered first by secrets and then by betrayals and these strong captivating characters draw the readers in with red hot passion and heart gripping emotions while the fast paced, smooth flowing plot keeps expectations building throughout the story with lots of suspense, turmoil, action and passion.

Lots of action and intrigue builds excitement and keeps tensions high as secrets are revealed, truth comes to light, battles take place and the danger escalates, with the enemies masterminding some truly despicable instruments of destruction for the Sentinels. Well written scenes and details capture the imagination and bring the story to life while the well-orchestrated events ensure that there is never a dull moment.

If you have read the previous Sentinels stories then you already have a great appreciation for the interesting elements, intriguing master plot and compelling, sexy characters that this fascinating world is comprised of and you know that Ian deserves some romance in his life but let me warn you that his story is will keep you edge until the very end. If you haven't read the previous book then you could still enjoy Ana and Ian's story and be able to pick up on the overall plot but you would be missing out on a lot of information and world building that makes the master plot so much more. Anyway, once again the Sentinels keep me glued to the pages and I can't wait to find out what happens next.

### **Sheryl says**

I have read a few of Doranna Durgin's Sentinel books before and loved them. Leopard Enchanted is no different. These stories sort of build on each other but even though I missed some of the books before reading this one it didn't leave me feeling lost. We see some of the people from other books also.

In these stories you have the Sentinels who work with nature and help people. Then there is the Atrum Core who believe they need to keep the Sentinels under control by any means necessary. Both sides trying to keep anyone else from finding out about them.

Ian Scott is one of the Sentinels who has the ability to become a snow leopard. He has been sent to the retreat for a break and recover. He has a hard time sitting still and feels he has let his people down in this war with the Core.

Ana Dikau has been sent by the Core on a mission to work her way into the retreat to plant an amulet and gather info on the man she has been taught to hate since a very young age. She wants so badly to fit in with these people that she thinks she is helping in the long run but doesn't know the whole truth of what she has been tasked to do.

When Ian and Ana meet, there is an attraction and a peace between them that could be shattered when the truth comes out.

I was pulled into this world of shifters with special abilities and the people who fight against them from the very beginning. I didn't want to put it down so I could find out what happened next. I loved Ian and Ana from the start. It didn't matter that they were on opposite sides and suppose to be sworn enemies. It was what was in their hearts that drew me in and made me love them.

I recieved an ARC through Net Galley for and honest review.
