If you love rummaging through markets for unusual fabrics, and can't pass an antique or second-hand shop without popping in, Bazaar Style is for you. Stylist Selina Lake and experienced interiors writer Joanna Simmons show you real homes furnished with intriguing pieces from different eras and cultures, which mix and match colors, patterns, and design. You'll discover an inspiring mix of vintage and retro influences, flea-market finds, and pieces inspired by a French brocante or Moroccan bazaar. You can also use these pieces to customize chainstore basic buys such as a plain sofa or new bed. Selina and Joanna explain elements such as Furniture, Textiles, Lighting, Accessories, Display, and Color, then they show you how a particular style works in Kitchens, Living Rooms, Bedrooms, Bathrooms, and Home Offices. Inspiring photographs by Debi Treloar. The perfect gift for those who like to mix vintage and retro styles.

loved pages 27 (the lighting, the pink factor, the no thank you ;)), 90-91 (everything), 96-96 (the couches!), 129 (the night stand holy wow).

Rachel says

Very colorful! Lots of pieces from England and Morocco (which makes it a bummer to be in the US!). A lot of interesting quick tips to incorporate this style into each room in your home in a variety of ways. There was also a focus on using bits and pieces of remnants and samples to create complete pieces.

Sarah says

This book is my new happy place. I love all the colors and the designs and creativity it displays. The style is fun and full of whimsy and it makes me want to go drop a lot of cash down at the Barnyard Flea Market on some new accoutrements for my casa.

July says

Beautiful Colors, Pictures, I wish enough money and I could hire a designer. I would show a picture or two from this book for inspiration for my bedroom.

Pam says

If you are creativity, artsy, and love color, this is the book for you. The gorgeous photos of beautiful rooms in full color will provide an infinite array of ideas for decorating your spaces. These spaces are actual places you can live in, warm and comfortable, but also affordable. If your favorite color is beige and your preferred style is formal, skip this book!

Ashley Howard says

Absolutley the BEST design book I have ever read!
The photography is gorgeous. I was inspired by every page and every word.
I only wish I had a home to decorate.

What I love about this style: combining texture, pattern, and color. What I don't love: the clutter. More is not always more, and I'm not a fan of collections. And wallpapering one's fridge? Nooooo. Maybe I'm more "bazaar style light" or "bohemian minimalism." (Most decorating books actually have several common elements that I think make all their spaces look appealing, regardless of style: natural light, mirrors, clear floors, and fresh flowers.)

I like this philosophy: "The bazaar look cannot be bought on one shopping trip. It grows organically over the years, with finds gathered from diverse sources. It celebrates the beauty of our everyday possessions, too -- almost anything can look striking when thoughtfully arranged and given room to breathe -- and loves color." I also like that the author has a section specifically about lighting ("built-in fixtures are complemented with quirky lamps, mismatched shades, and fun fairy lights") -- it's surprising how few books mention lighting when it's so essential.

To remember:

p. 96 - patchwork wallpaper
p. 100 - colored glass wall
p. 118 - tapestry wall hanging

Relyn says

More like bizarre style. Ick!

Anne says

A new favorite.

Natalie says

design book... lots of ideas if you're not afraid of color...

Lori Shafer says

Bazaar Style has its own style without a doubt. For someone looking for unique decorating ideas or how to mesh styles, this book is a good place to look for inspiration. Some of the ideas seemed fairly strange, but I must admit they made an impact.

Elizabeth says

If you like "Domino" magazine or the sites: decor8, apartment therapy, poppytalk, and the like then you will enjoy this book. Beautiful color, patterns, and design!
