Hew France says

I found this textbook to be very infuriating. College is supposed to be a place for open-mindedness, which becomes difficult when your class curriculum is so close-minded. Everything in this book was extremely one-sided, and no counter viewpoints were ever explored. From an anthropological standpoint, white, straight, American men are evil as hell. Cool story...

Ietrio says

An academic paper pusher paid by the state disseminates emotion under the guise of "anthropology". Humanities seem to have a long way till they get to the level of science. At least the phrenology is in the past.
