Nugraha Setya Ardi says

perhaps this is the most comprehensible aerodynamics book

Andre says

This is the worst book I've ever had. It's too big as a doorstop, and (surprisingly) not aerodynamic enough to be accurately being thrown to my neighbor's dog. I think it's sole good purpose is to knock your spouse's out if he/she's snoring.

Allen says

Reviewed this text from undergrad to prepare for one of my classes. It's a lot of fun and a very interesting subject. I understand the concepts much better now than I did as an undergrad.
