Hoax C.L. Stone

Someone tried to kill Kayli Winchester. That someone is going to pay.

After going overboard and nearly drowning, Kayli regroupes and joins Axel, Corey, Brandon, Marc, and Raven back on board the Lucienda. This time, she's brought reinforcements. Liam and Henry join the team in an all-out hunt for a killer. It can't be too hard; there's only so many places to hide on a cruise ship. But the number of suspects is climbing.

Tensions are high, and everyone is on alert, but along the way, there's way too many distractions--very hot distractions. Kayli's done hiding her feelings. She's showing her hand, come what may. She's never held back before she met this team--why start now?

But when one of their team members disappears, all clues point to mutiny. Is the team going to fracture because of her? Did someone throw her overboard because of jealousy?

Kayli refuses to believe it, but she'll have to provide proof before the murderer finds out she's still alive and comes back to complete the job.

I loved this book but then again I love both series of the Academy boys. I couldn't believe everything that happened, had many moments where I would have a mini freak out about what was happening in the book. Now I just have to wait for the next one!

Couldn't get into this one and it makes me so sad. I've never been a fan of Kayli before, but instead of disliking her in this book, I just found myself bored with her. I wasn't even frustrated with her decisions like I usually am. I just didn't care. And the boys barely had any time to shine.

I think I might shelf this series from here on out. I only read it for the sake of loving Sang and her boys and hoping for cameos.

But that doesn't change the fact that I'm still OBSESSED with the *Ghost Bird* series and I will pretty much devour anything about Victor, North, Silas, and the others, even if it's adorable mundane tasks such as painting Sang's toenails and not-really-watching horror movies. That series has always been one of my favorites from the get-go and it's an insta-recommend every single time.

Bye, Kayli. Won't really miss you.

I have to admit, I didn't start out liking this series as much as the Ghostbird one since the characters and the overall feel of this series was so different, but with the last 2 books (Accessory and Hoax), i'm having to re-evaluate some of my earlier thoughts on this series.

Tensions are extremely high in this book and I found myself flying through the book and craving the next one (Tempest, I think its going to be called?) much like a sugar deprived kid in a candy store with no supervision (lol). I think I may want this next book more than 'Black and Green', which is almost sacrilegious to me since, hellooo its Mr. Blackbourne and Sean's book! But that just goes to show how great this series is turning out to be.

I admit that even though I got 'Accessory' when it was released right away, I sort of might have skimmed through it and pushed it aside without much vigor since I was more into re-reading the GB series again (for the 5th? 6th? time again). Soooo.... I actually had to re-read the previous book THEN read this one and i'm so glad I did because the cliffhanger at the end of Accessory might just have been the biggest cliffhanger to cliffhang them all.

Kayli matures a lot more in this book but I feel that Blake had the most character development of all the characters thus far. You really do see how much he cares about her because (view spoiler).

But omg, what was with that revelation about Kayli near the end C.L?!?! I legit found myself doing the 'scream' face because I felt so bad for her! I'm starting to think you might have a thing for putting the heroine's in troubling medical situations LOL but I haven't read the other books like 'Spice God' and 'Smoking Gun' (i think they're called) so I have yet to prove that theory.

Either way guys, if you have the chance then definitely read this series because even though the first 2 books are kinda meh and the 3rd one starts getting a little more interesting, the last book and this book more than makes up for everything because you finally see the carefully laid out plot in the first 3 books finally come into play. You won't regret it!

This entire series seems to end on cliffhangers

Talltree says

Wow, that ending!! I never saw it coming...10 stars!!!

Pao says

I'm giving Hoax 4 stars and a place in my favorites shelf.

Can you believe it?

I still can't believe it. Specially because it takes place right after Accessory which I STILL HATE WITH ALL MY GUTS.

Full review to come.

Another addicting story to the series!!

Jane Curry says

Too much fluff, not enough explanation. Unrealistic acceptance from the guys, their strong personalities just willingly giving the heroine everything with no questions asked. It's not the characters she has built in the previous novels. I expected a little resistance before agreeing, not just rolling over and giving in with no second thought and having the guy from the other team explain to them all at once so we didn't get their reactions until afterwards was a huge cop out. Extremely disappointed. And of course, GET AN EDITOR!

Liz says

OK... The 5th book in The Scarab Beetle series didn't do much for me. Maybe because there's been quite a while since I read the previous 4 books and the momentum is just simply gone. I had forgotten the 'group' chemistry and happenings. I guess it's always the risk factor with series.

I always loved Raven's character. I have something for book-Russians. Exotic... yet not really because Russians are just across the border from me and plenty of them in Estonia. So, that would allow me to always put a critical eye to the Russian characters in books- are they well done or not. Raven is.

The only, and I mean the only, bit I loved about this book was Raven and Corey's development. That was truly and utterly HOT! Raven and Corey are extremes to each other in terms of their personalities but I could see them working out so so so well. I think I'm actually going to highlight this section in the book and read it again... that was intense! :D

Other than that, as said, I had forgotten the stories 'crime' line and the momentum was just gone for me and I skipped quite a bit of 'pondering' bits in the book just to get the lowdown and move on.

Will I read the next book or will I stop with the series here? I wouldn't not know the answer to this.

Jennifer says

At the end of book 4, Kayli and Blake were thrown overboard. Were they getting to close to revealing who was stealing money from Ethan, or was one of the guys in the Academy group upset because Kayli finally admitted that she has been flirting with all of them and is unable to choose among them? Kayli and Blake make it back to the ship and try to figure out who was responsible for their attempted murders and what was the motive. Unfortunately, one of her guys is a main suspect. Lots of things happen in this book that distracts Kayli from the original mission - she must figure out who threw her overboard, she gets a nasty head injury that affects her memory, and she reconnects with each of the guys and weighs their acceptance of her being involved with each of them.

I'm completely addicted to both this series and the Ghost Bird series. I am supremely upset that the next installment of this one was due in late 2017 and isn't available yet, especially given the ending of this book. Gah! I have to find out what happens!!!! You guys know that I am not the most patient of readers when it comes to an unfinished series! I guess the best I can do is mark it as want to read and cross my fingers that it will be out soon.
