Neonatal Certification Review for RNC / CCRN: Respiratory Questions Christine Woods

25 review questions focusing on the respiratory system for nurses to prepare for the RNC or CCRN exam. This is the first in a series of questions designed to focus on the different areas tested in the certification exams. Prospective exam takers can tailor their exam practice to areas in which they are less confident, rather than purchasing general exam questions as a whole.

The author is a practicing neonatal nurse practitioner with nearly a decade of experience in a variety of NICU settings from community Level II NICUs to several Level IV children's hospitals.

Email the author at christinedianewoods@gmail.com for feedback and requests for future sections. Her aim is to release at least one new set of questions every month focused around a different topic per the RNC & CCRN exam outlines.
