## **T**heron Destiny Rebecca Lorino Pond , Rebecca Anthony Lorino

Their race was being exterminated. Earth held the first compatible females they had come across. Their race now depended on the women of Earth. Avery was minding her own business on her way home from work when she noticed shadows pursuing her! She was going to be kidnapped but she wouldn't go without a fight. Zeb, Theron Warrior, promised to protect her with his life and would do anything for her to make her his forever. He needed to protect her from the one warrior who wanted to harm her in a fit of revenge. Can two individuals from different worlds come together and have a life of love together?

### **Nyx says**

I loved it. Can't wait to get my hands on another. Thank you Rebecca:-)

---

### **Dena says**

#### **auctioning off mates... hmmmm**

I liked the book it was interesting there was a couple of spelling issues and mix ups but it did not deter from the story. Aliens coming to earth in order to receive mates. They make a deal with nasa information for women. When they capture the women they auction them off. I of course had a problem with this and also the fact that there were numerous flaws associated with this distribution and procurement. The characters were lovable and you only wanted the best for them. In the end it is a good series.

Theron Destiny (Brides of Theron #1)by Rebecca Lorino Pond

Their race was being exterminated. Earth held the first compatible females they had come across. Their race now depended on the women of Earth. Avery was minding her own business on her way home from work when she noticed shadows pursuing her! She was going to be kidnapped but she wouldn't go without a fight. Zeb, Theron Warrior, promised to protect her with his life and would do anything for her to make her his forever. He needed to protect her from the one warrior who wanted to harm her in a fit of revenge. Can two individuals from different worlds come together and have a life of love together?

---

### **Amanda Richardson says**

I liked this first book about The Brides of Theron. There were some grammatical errors, but the story was good. Some of the conversations were a little silly at some points. But I did like the book and will read the next ones in the series. I am most interested in Emma's story.

---

### **Angarad says**

I read a few books about human women kidnapped by aliens to be their mates and I have to say, this one was one of the best in terms of building and layout. But it was sadly very boring. There were no suspense, no unexpected events and the Therons warriors were so close to human I didn't see the difference. The characters were too dull. One or two tantrums and that's it. No real fire, no passion. Too bad really

---

### **Bethyboo ? The Book Addict ? says**

I think i fell asleep three times while reading this. I just couldn't get into it. The writing style was just all over the place and most times i had to reread a sentence or paragraph to figure out whos POV i was reading and/or if it was a flashback of some sort. I also didn't like any of the characters and i just wanted the book to be over.

---

### **B.E.Love says**

This is book 1 of Brides of Theron, with very few woman on the planet Theron Zeb and others go to earth to find mates so that their planet doesn't become extinct, there Zeb see's Avery, while trying to catch her he saves her from another warrior who wants to harm Avery. Now Zeb will have to bid and win Avery, once he does Avery and Zeb will have to move past their differences and Avery will have to adjust to a whole new planet. As Avery and Zeb fall in love a warrior has plans not only for Avery but for all of Theron and he won't stop till he gets what and who he wants. this was an ok read, I felt at times like I disconnected from the story and I wish that I would have connected with the characters and story more.

---

### **L says**

#### **Not bad...**

This is an interesting story. The characters are believable and really come to life in the story quite well. Of course quite a few situations remained unresolved so I will probably read the next one that follows.

---

### **Gwen E says**

#### **Good but bland**

The idea of the story was good. The delivery of the plot was just a little one dimensional at times. Never got a real feel for the characters or the environment, yes they are in space but no real descriptions or impressions. There could have been so much more with the characters, the storyline, and the protagonist. Overall like a bland store bought chocolate chip cookie when you really wanted a warm fresh homemade one.

---

### **Claudia says**

The book as the idea had a lot pf potential but somehow didn't work for me. It didn't make sense to me when the women were bought by their future mates. Being desperate to have a mate and coming from a warrior race a fight for a mate maybe would have worked for me.

---

I hope the next book gets better.

### Space Cowgirl says

#### Alice? Through the Wormhole?

Avery??, kidnapped from ?earth by a ship load of huge alpha ?alien warriors?? from the planet Theron, finds herself in a room with 15 other young human women. They are to be the ? brides of some of the tall humanoid warriors?????, sold in a shipboard auction.

Zeb?????, commander of the ship, felt a spark, a charge, when he carried Avery?? into the ship when she was injured during her capture. He outbids the other men and Avery?? is his.

She is combative? and ?stubborn at first, and actually stabbed? her captor, Lars? in the eye, blinding it. He also bids for her but he wants to hurt and kill her, not ?love her.

He holds a grudge and plots to steal her from Zeb????? and leave the ship.

I liked the book very much but wanted the bedroom scenes between Avery?? and Zeb????? to be more graphic and descriptive.

If the book is supposed to be a romance??, it should be an erotic romance! I know this was the author's first book, so I hope the next one has some xxx in it!

YEHAW! Ride em Bareback?, Cowgirl!?????

### Megpie says

#### 3.5 STARS

I don't know what it is but this premise 'Aliens kidnapping Earth females as mates' never gets old for me. I can read 100 of these books with the same exact premise and I still love the concept. It's such a guilty pleasure and Theron Destiny did not disappoint. It wasn't the best I've read but it wasn't even close to the worse. The writing was good and there was actual 'meat' to the story. There was back stories and development with the characters, plot, and setting.

One of my favorite parts of alien romance books is reading about the cultural differences and the awesome futuristic technology. I also like reading how there were different types of aliens working in the shops on the mothership and how they had four arms AND actually looked like aliens. (Just FYI the hero and people of Theron look human, except for being really tall, muscular, and having pretty colored eyes) and I loved that Avery our heroine went into an alien pet store (yes an alien pet store- how cool is that) and bought her a little green furred three eyed alien-cat. I like the added stuff like that, so fun and interesting!

Overall I like the start to this series! I like that it wasn't cheesy like a lot of these other alien romance abduction novels. I liked the men of Theron, I liked the plot and setting, I liked the side characters, and I liked Avery the heroine- she actually FAUGHT to get back home. (not that she gets her way) But I find it so unrealistic when a lot of these books have the woman take it all so easily, like yeah getting kidnapped BY ALIENS to be their mate isn't a big deal. The author in this story made that transition more believable for me. I'm definitely going to continue this series because so far I'm liking it!

## **Timeforme says**

### Main Characters:

Avery - A human woman taken by the Theron warriors to be a breeder mate

Zeb - The Theron warrior who purchases Avery at auction

### Synopsis:

Avery is taken to be a breeding mate to ensure that the Theron species is not lost after a calamity causes most of their women to either die or be infertile. The story revolves around Avery adjusting to her new life within Theron society and with Zeb as a mate.

### My Thoughts:

I first need to say that I think it is inappropriate for the author to write a review of a book she wrote and especially to give it a rating of any kind, particularly five stars.

Other than that, the pacing and storyline are both uneven and the characters seem to have mood and personality swings that are to the point of ridiculous.

Some of the things that totally annoyed me:

(view spoiler)

---

While I obviously have some issues with this book, I gave it a so-so rating of 2 because there really was a lot of potential in the writing for a good book. I think, given more experience (I am presuming this was a first attempt at a novel), some good books might follow.

---

## **K LeeB says**

I am hating this book so far. The writing isn't the problem it's the storyline that has me wanting to kill someone. We got women who are bought and sold to the highest bidder and all of a sudden she just gets over it and decides I just get with the alien program. Now I have read other kidnap by alien books that have not rubbed me wrong, but it is something about buying a human being that rubs me all types of wrong. Maybe it is because of my culture but the selling of human beings makes me want to vomit. The mere fact that they refer her being not okay with being sold as a "tantrum" makes me want to claw my own eyes out. I'm am going to finish this series and I might even like the author but this whole buying humans like slaves is repulsive to me.

Update: Okay I liked them book in the end, but still can't stand the aspect of the selling of people and her Stockholm-like acceptance of it so quickly.
