Savior Nicole Blanchard

I thought I put my past behind me.

I lost everything when I testified against my fiancé for the murders of three women. After the jury delivered a life sentence, I ran. I hoped if I could disappear, maybe the horror he caused would, too.

When I return to Florida for the first time after his conviction, I'm determined to face my fears and get my life back. Then, a woman is murdered and I'm the only one who believes her death features the same signature as those I'm trying so hard to forget.

Instinct tells me to run again, but local cop Logan Blackwell has never let a suspect—or a woman—get away. He's made it his own personal mission to solve the case and he needs my help to do it.

I have no choice once we learn I'm the next target, but I'm not interested in getting close to another man, especially not a sexy former Marine who has secrets of his own.

The last single guy from the group of friends and brother's in arms (past books and this all connect together) Piper is one the run from a killer, he killed others and her twin sister and messed with her head and making her believed it was her ex fiance and convicted him made her run. Now in a little town with very nice people her past will come and hunt (not haunt) her down. Her savior is near neighbor and local detective Logan Blackwell.

Logan felt Sirena (Piper) was running from something and hiding information but he will be determined to get the truth, he just never thought to get it a killer will be leaving bodies around.

Wasn't a bad story but the very first part, we were in the killer's head and what he felt when he killed his first-that we know- victim.

Book 5 Honor will be about the man that Ben saved Scott Green.

4.5 Thrilling Stars!

Wow, talk about going out with a Bang! This final book in the First to Fight series started with a Prologue that will get your heart pumping and take your breath away! Then when you think you can settle in and relax a bit, it will once again take you by surprise.

Piper was a carefree, wild, and reckless college student when the unimaginable happens to her. Now, years later after running from her old life, she is back in Florida, ready to take her life back. She wants to lay her demons to rest so she can find joy and happiness again. She takes a job at a Bed & Breakfast in a small sea side community and moves in across the street. Her new neighbor, Logan Blackwell, is an ex. marine, now local police officer who is dark, masculine, and sexy. She is drawn to him but isn't ready to start dating yet. Logan is intrigued by this beautiful, independent, and mysterious woman. He is patient and persistent, breaking down her walls until she finally agrees to go out with him. Soon tragic events begin happening around them, and Logan will stop at nothing to protect Piper. This story is raw, bold, and emotional. Logan and Piper are two strong characters who feel honest and authentic. I enjoyed their banter and their chemistry was explosive. This is a fast paced suspenseful journey that is exhilarating and emotional and I enjoyed every minute of it. I am sorry to see this series come to an end but look forward to what Ms. Blanchard creates next!

I have only read one other of the stories in this series, but you don't need to have read any of them to enjoy this.

I should warn you though, the author doesn't sugar coat the trauma which is the catalyst for Piper's current

life. But that adds to the complexity and peril of the story.

The connection between Piper and Logan fair sizzles off the page, which is, on some levels, surprising, given her history. However, this story, these characters, really captured my imagination, and I genuinely begrudged having to set it aside to go to work.

As with the other book I read, this is well written, with suspense, a little humour and a lot of action. and high emotion. I really enjoyed it.

I received a copy in exchange for an honest review.

Savior

First to Fight #4

By Nicole Blanchard

I was so excited to hear that Logan was finally getting his own story.

Logan Blackwell & Sienna had rocky start... He Is police officer & Ex-Marine so he is automatically suspicious, let alone anybody around his family. So once he realizes his Grandma & Aunt hire new help at their B&B without doing background check..

Piper/Sienna Davenport has suffered an unimaginable loss and is trying to run from her past. Piper loses her roommate & Twin sister to a serial killer. Make matters worse her Ex-boyfriend implicated in the crimes. Piper freaks & leaves town

Piper returned to Florida to work at a B&B that her friend Chloe recommended. Lil does she realize her pass has seem to have caught up to her once again....

Savior is an extremely suspenseful& we find plenty of mystery in the novel also & we can't forget the love story....This book kept me glued to the pages. I really enjoyed reading Savior & I couldn't put it down. I hope you enjoy it as much as I did

I just live anything this author writes & this was no exception. Logan & sienna were great. I love catching up with other characters.

DawnMarie Carpintero says**5 Stars**

I was given this book for my honest review.

I loved this book. The simplicity but yet the complexity that brings this book together is simply amazing. Author Nicol Blanchard brought this book full circle with these amazing characters and the hotness that they provided.

Major Kudos

Happy Reading

Shawn says

Three and a half stars.

Piper has been through unimaginable loss. She has had everything that matters ripped away!

Logan is dealing with his own demons. But he is drawn to Piper and has to figure her out.

Their chemistry is a slow burn. It took a little bit for them to connect, but once they do, whoa!

Logan is every girl's dream! Persistent, devoted and loving.

I loved the premise and plot. I felt like there were some holes or inconsistency in the story.

I would still recommend this story. It is part of a great series.

I voluntarily reviewed an Advanced Readers Copy of this book.

jenjn79 says

This was a very frustrating book to read. There were parts that I loved and parts that made me just want to bang my head into a wall.

Summary:

Piper has been drifting since tragedy destroyed her life. She can't forget what happened and can't move on. She ends up in Nassau, FL, helping out at an Inn. Instinct and her wariness of people tells her to stay away from neighbor Logan, one of the local cops. But she can't fight her attraction to him and his persistence in getting to know her. Just when she starts to let her guard on and hopes to move on with her life, the past comes back haunt her. And she may not survive the threat.

Series Note:

Fourth book in the First to Fight series. It has a common set up characters but can be read on it's own.

On the surface I enjoyed this book. I'm always up for reading a romance with a good suspense plot. And this book starts off with the proverbial bang. It's heartbreaking and gripping and I had high hopes for the rest of the book. It partially lives up to those hopes.

I enjoyed the basics of the suspense portion plot. While not the most original it was still interesting and had me wanting to keep reading to see what would happen. It wasn't the most well-developed suspense plot but was fairly decent. I felt it could have been fleshed out more and wrapped up much better. At the end I kinda didn't feel like I knew the whole story.

The characters were good and I was engaged in the romance between Piper and Logan. With all the Piper has been through you can't help but want her to get her happy ending. Logan's character was a bit underdeveloped. There are things mentioned then never fleshed out. It left him a bit superficial.

Where this book falls apart is in the details. There is a lot of inconsistency throughout the book, and also the series, that really takes away from the momentum of the story. When you're zipping along through the book and come across something that doesn't make sense it stops you in your tracks and you have to try to figure out what doesn't match and be annoyed about it. And there's a lot of that in this book and across the series. I just got so frustrated when reading.

Examples:

Gavin is Piper's ex-boyfriend at the beginning of the book and then about two-thirds through he is suddenly her ex-fiance.

At the start of the book, there are heavy implications that Logan has a problem with alcohol. There is a short line a little while later with Piper acknowledging it (which made no sense as there was no way she could have known it) and then that aspect of the story completely disappears. Along with that, there are indications of problems in Logan's past with his family but then that disappears as well.

Piper is initially said to be drifting, trying to deal with what happened, and avoiding a persistent reported. Then suddenly she's one the run because the killer could still be after her.

Piper's car goes from a 6 year old sedan to a 1998 vehicle (which would have made it like 17-18 years old).

In the epilogue, Piper names one of her children Lennox - supposedly in honor of her friend she lost. The assumption being Lennox is named after Lena....who was a peripheral character that Piper had one conversation with in the book. Made no sense. I couldn't help but wonder if the baby was supposed to be named after Carly, Piper's good friend from college who was murdered.

The timeline from the murders to the current time also seems out of whack a lot.

Olivia and Ben's son Cole is said to have had a heart transplant...which doesn't match the previous books. He had his surgeries and was doing great and then suddenly in this book he'd had a transplant with not backstory given.

And this one drives me nuts...at the end of book 2, Ben and Olivia's story, the epilogue is during Cole's 2nd birthday and Olivia tells Ben she's pregnant. But throughout book 3 and this book, she's not pregnant and has no other kids. Timeline wise, she should have.

Also, maybe it's just me...but when a guy (Ben) has had a traumatic brain injury and has permanent hearing lost...STOP HAVING HIM GET PUNCHED IN THE HEAD FOR NOT GOOD REASON!!!!

**

Those are the inconsistencies I can think of, but I know there were more. For someone like me, who is a detail oriented reader, these just really threw the book off track for me and kept me from really getting into it as much as I could.

There's a lot of potential to the story (and the series) but the execution is lacking. With a little more attention to detail I think the author could write some really good books.

WARNING: this books contains graphic violence against women and touches on rape (though not graphically).

Chasidy says

From the first few pages of the book, I was hooked! I could vividly picture the murder scene in the Prologue. Nicole does an excellent job of capturing the characters and painting a vivid picture of the storyline.

My heart grieved for Piper and the losses she faced early on in the book. Struggling to find a place to start over and start fresh, Piper finds herself working at a B&B in Nassau. Piper soon meets Logan, her neighbor. The chemistry between these two is intense from their first encounter. Piper tries to push Logan away, but he is persistent and doesn't back down. Before long, Piper's past comes back to haunt her. Will she escape this time?

I enjoyed the intense rollercoaster of emotions this book took me on and can't wait to read more from Nicole. I received a copy of this book for a honest review.

Miriam Meza says

I loved about this book the simplicity of the narración and the intensity of the plot.

There's a man hunting girls on a college campus, in Miami. He attacks them, rape them, breaks them. One of the victims was Piper's friend, and even when she knows about the danger, one night she left her defenses down. That night changed her life forever.

Piper runs away, hides herself in different places trying to forget... and then, she meets Logan, a former Marine turned into a cop. When a man started to repeat the MO of the criminal from Miami, Piper has to trust in someone else to help her, to save her.

This book was great, with an amazing and suspenseful vibe. I didn't read the previous books, but now I will. This is an standalone so you can read it first (as I did).

Amber says

Savior is a beautifully passionate and undeniably gut-wrenching story of unrelenting hope and brazen love beyond crushing despair and devastating pain. This is story that will shake you out of your calm, peaceful, boring life and plunge you into the twisted madness of a tale that for all that goes wrong desperately clings to the need for light amidst the never-ending, heavy darkness. While you feel the fear, the horror, and the evil closing in, you also experience the fierceness of the length and breathe that the goodness of this world will fight to break through to warm, strengthen, and encourage you every step of the way. Whatever terrible battle you find yourself facing each day, please don't forget that there is good all-around you just waiting for you to take hold of it and draw into you. The small good things in this world are never more appreciated or needed then when we are surrounded and oppressed by the evil that lies in wait for its next victim.

Logan has dedicated his life to a cause that has sucked him dry. He has given and given until all that is left is shell of the man he once was. The love he thought he found turned out to be brittle and wracked with weaknesses. Left floating through a life he was once sure of, his only anchor is found in his aunt and grandmother. Looking after them and the people in his town is all the purpose he has left. Just as he is getting used to his comfortably useless existence, fate throws Piper into his path. She leaves him unsettled and stirs emotions in him that he doesn't want to feel or understand. How can one woman turn his world upside down and yet make him want to keep coming back for more? Can he unravel her secrets before she is lost to a past whose horror rivals his own, or will he lose her before he realizes just how important she has become to him?

Always the quiet, recluse of the close knit group of friends in this series, Logan's story always had me curious. With a quiet soul usually comes deep scars and great pain, and to think that he literally found his match in every way in the form of Piper made me beyond ecstatic for him. Then, I learned about Piper and her devastating lose, and I was beyond thrilled to realize that Logan would end up being her shining light even when he saw himself as the complete opposite in his own eyes. The brooding loner and the broken beauty became the Savior that the other desperately needed and deeply longed for. There couldn't have been a more perfect story for these two incredible characters!

What I wouldn't give to have even a tiny fraction of the monumental talent that lives and grows within the very heart of Nicole Blanchard. Her words forever seer themselves into my soul, and her characters delved underneath my skin to prove that no matter what battles we have to face, they are worth every drop of our blood, sweat, and tears because they make us into who we were always mean to be. They lead us to the patch that we are mean to walk, and they push us into the crosshairs of the people that are meant to fill our lives and touch out heart. Instead of morning our lot in life, we should be always grateful for the blessings that we have no matter how small or how big they might be. The struggles of others fuel our own courage, strength,

and hope to step forward into another day.

Hanne says

Savior is my first book by this author. It's the fourth book in the First to Fight series. I never had the feeling that I missed something, so this book can be read as a standalone. This book does make me want to read other books by this author and get to know the secondary characters better.

Something horrible happened to Piper and she moved away from home. After a couple of years, she moves closer to home. She has a new home and a new job. She likes her new bosses who are nice and genuine women. She doesn't really get along with her neighbor, Logan, since he likes to cause trouble.

Logan is intrigued by his new neighbor, but he doesn't trust people easily. His aunt asks him to help Piper and they spend some time together. Logan realizes that his first idea about her was wrong and he wants to know her. He does need to convince Piper to give him a chance first.

If you're looking for a book that's very steamy from the start, this is not that book. This book does have one of the hottest shower scenes I have ever read. There is plenty of romance. There is a deep connection between Piper and Logan. Logan will always protect Piper. Piper feels safe again for the first time in a long time. They make each other open up about their past and move on. They live again. Piper and Logan are amazing characters! They are both strong and kind.

The book starts with a dark, brutal prologue, but it gives you an idea about what the book will be about. Savior is suspenseful. Piper thought she never had to go through the same hell again, but there are new murders happening where she lives now and she's in danger. I was constantly wondering what was going to happen next and how the book will end.

I really wished I could give 4.5 stars. I was doubting between giving this book 4 or 5 stars. I loved the book until the end. The ending was too rushed for me. There was a twist at the end, but it was over too soon. I wanted to know more. I did love the epilogue. It was a beautiful ending to this amazing story.

This story is amazing...I read it through in one sitting. I just couldn't wait to see what happened next. The authors' writing draws you in and keeps you mesmerized.

I really adore this series. I seriously do. The first book stole my heart and the fourth in its series continues to ride its own path in captivating my mind and soul. Each installment has its own particular flavor and voice, and I enjoy how it's not embroidered with over the top drama. I just hate the stereotypical cliched broken

characters, ya know?

Anyway, another gem in this addictive series!!

Romance Between The Sheets says

My favourite two books of the series remain as Warrior and Survivor.

I am sorry but twenty chapters of mystery and it is all over in two pages that end chapter twenty and then we are given a Epilogue kind of left me flat with too many questions in my head for a STANDALONE.

What I loved - the connection between Logan and Sienna was just immediate and I felt it to my bones. Logan was perfect for Sienna and the Epilogue simply ended beautifully for the characters, thank you for giving Sienna the gift you did, it was like a full circle. I did find it a bit weird that Logan next caught onto the "secret" considering how alpha and protective he was.

Grandma Rose and Aunt Diane were two characters I loved from the start and their world of B&B made a safe haven for Sienna. To watch these two women circle Sienna and give her a safe place was a beautiful thing to read and their humour gave light to sometimes dark moments. Their banter with Logan being the overprotective Aunt and Grandma was fantastic, love seeing a grown alpha man brought to hell by two overprotective loving women.

What left me unsatisfied was the pace which towards the end was too fast in order to wrap up the whole drama and suspense, especially the motel scene. I mean it was like "wham bam thank you ma'am" and it was all over. We got no further information.

I have so many questions about Joseph and Gavin. Did the killer think Paige was Piper? Why did he kill off her friends? Was he trying to get rid of them all so she would need him? I wanted to know more about that fateful night at the nightclub, I was dying to know his side of the story? After finishing this book I actually went back to the when she was at college and checked some paragraphs in case I missed something as the whole ex Fiancee Gavin was not sitting right with me.
