**A shy BBW teacher + a sexy billionaire wolf shifter + a mail-order bride company = a white-hot wedding!**

*I have three conditions:*

1. *I want to be married as soon as possible*
2. *I will move in with you, rather than having you come to live with me*
3. *You must agree not to ask any questions about my past*

*I realize that this situation is very unusual. Therefore if you accept my conditions, I am willing to pay you a million dollars, even if the relationship doesn't work out.*

That's the email Robin Tucker, a small-town kindergarten teacher, receives one morning. The money would be nice, but being married to Austin Sullivan, the hottest man she's ever seen, would be even nicer. She's spent her life being too shy to take a chance on adventure, and Austin could show her a whole new world. But is he hiding a dark secret? Or could saying yes to his offer be the best decision she's ever made?

Austin wants to leave his family of dangerous and dishonorable wolf shifters. A wife would be the perfect excuse to move away from home and start a new life. But once he meets Robin, sparks fly, and he realizes that she might be the mate he never believed he could find. Can he protect her when his brothers come looking for them both?

**This is a sizzling hot, standalone BBW werewolf romance. No cliffhangers!**

#### **Pour yourself a cold one and settle down with this. You deserve it.**

This is SO not my usual thing, but a good friend recommended it, and it's a long holiday weekend, so why not. I really liked Robin; she seemed to have a good head on her shoulders, as well as an adventurous side that made the whole mail-order-bride thing slightly less ridiculous. Austin was intriguing as well; the sleek wild nature of the wolf mingling interestingly with the bit of shy uncertainty of a younger sibling. The bear-shifters were intriguing and unexpected -- I would enjoy reading more about them.

For as ridiculous as the plot was, there was some really lovely writing here: "There were strands of black and white scattered throughout his fur, reminding her of stars in the night sky, or moonlight on running water...He even had brought a wild smell into the house with him, animalistic and clean, reminding her of snow and plowed fields and pine forests."

This was really, unexpectedly fun! I'm looking forward to more.

Robin and her friend decide to sign up for email husbands while enjoying a night of drinking. She is surprised two years later when she receives a response with three conditions to which she agrees. After all Austin is the hottest guy she has ever seen.

The Billionaire Wolf Needs a Wife has a very good start that hooked me in right away but lost me in a few places. The chocolate chip cookie scene was really super-hot and got even better from there even if they had only met about ten minutes before that. I thought that the motorcycle was over the top but then it improved some when it turned into something sensually erotic. After that the book goes into a blah zone that it doesn't really recover from leaving us with an anticlimactic and predictable ending leaving me doubtful that I will ever read this particular book ever again.

Austin is looking for a wife ASAP (away from his family). Robin agrees to his 3 conditions - 1 being not questions about his past. Austin comes to realize that Robin is his mate and that he loves her. His brother tries to come between them and Austin nearly loses Robin because he didn't let her know about his past. They get their HEA. Would love to read about some of the other brothers.

### **Wolf shifter standalone read.**

Kindle Unlimited book. Standalone no cliffhanger read. He needs to escape his awful family. She signed up a year ago and never heard from anyone until him....

I am binge reading and have quite a few of Zoe Chant's books that I had one-clicked and wanted to read, but would always have something else come up. I have to say. TAKE THE TIME AND READ ALL OF HER BOOKS!! They are each unique, some follow a specific group, but each can stand alone and have a happy ending. They are feel good and quick reads! I absolutely love all her books I have read! And they never leave you feeling like you're missing something at the end.

### **An entertaining read**

I enjoyed this novella and really liked the two protagonists, Austin and Robin. However I have to admit it did not engage me as your other books have. I did not feel that the characters had time to build upon their relationship; there was little developed conversation between the two except for the first time they met. A lot of telling the reader what is happening rather than showing us so we can draw our own conclusions. But on the whole an entertaining read. I would gladly recommend this author.

This one was not for me I'm sorry. For a short read it was a little bit eye roll worthy, characters were not very likable, especially the H and his family, just too underdeveloped. Doesn't inspire me to pick any more up in the series.

Good short story. Austin wanted to be a better person(werewolf) but couldn't get there in his family's pack. He had billions on his own all he needed was a mate living somewhere else.

Robyn didn't think she'd ever find a man--one she could love and who would love her for her. As a joke, she and her BFF signed up on an Instant marriage dating site. Austin found just what he needed! He didn't think there would be love, but you can't have everything.

Did he find everything? Would Robyn go through with it? Maybe considering the incentive he included.

Would his controlling family just let him go?

#### **Amazing author**

Zone Chant is an amazing author. I have fallen in love with every single character in her books. I highly recommend her books.

#### **What!**

I guess this story was one of them that is just okay. I was kinda bored reading it. Not one I would read again.

#### **Cute story**

Not a bad read, cute story about a wolf who wants something more than being bad like his brothers and woman who never thought she would be loved. Read it one setting so a quick read, perfect for when you want your HEA that day. Author has a lot of potential, she is able to make you feel Austin's happiness at finding something good in life.

### **Keoki Ki`Ili says**

Wanting a better life for himself our hero leaves his reckless family behind. His way out, a pretend mate he meets via a mail order bride website. He finds out soon enough she's the real deal, now he just has to tell her what he really is.

### **Emily says**

Austin Sullivan wants to leave his pack, he wants some good in his life and he knows if he stays with his family he will never have it. Putting out an ad for an arranged marriage seems like the sensible thing to do. When he gets a response from Robin Tucker, he takes the chance.

Robin is worried Austin won't be interested once he gets a look at her, but he is smitten right away. However he is holding out the truth of what he is worried she will not understand, or will she?

Fun quickie. I liked that Austin's family dynamic was not perfect and he wants a fresh start. Cute couple,

would have liked it to be longer but it was entertaining all the same.
