Read all of them except for two and honestly best animal series. Loved The Taggerung. Hope they make the rest of the movie series.

I actually read the whole series of his redwall books a few years ago. couldn't get my preteenage grandkids (at the time), interested. I greatly enjoyed them! I just today saw they may be made into a movie. Believe me, the books will still be so much better! but I will still watch the movie if it comes out also!

This was the greatest childhood book series of all time. Think your kid isn't ready for lord of the rings? give them this. It's the greatest, the characters, the accents, the amazing world building, the disruptions of foods and recipes, the songs and the poetry. It's like I'm already in love with cute animals, by cute animals living epic medieval sagas is like the most specific amazing thing you could possibly ever write for me. Hahaha this is my favourite series in the world, with it's nail biting moments loveable characters and steadfast heroes this series has captured my heart for the past 5 years of my young life... The ballads, songs, poems and riddels are beyond amazing and add so much to this wonderful series... I so dearly wish that he could be able to write more and make me shed a tear for a beloved creature who died trying to defend it's home and those he loved most...Mr Jaques has spun many a tale and created such vivid images I strongly believe that his books will remain loved for a very very long time...Oi Serpintly think so...Oi really do...

Best series ever. Jaques manages to make the characters come to life and his food descriptions are unbelievably mouthwatering. The story lines are almost always sweet and clever. Would read every last one of these to my kids.

Yes, this series of books is amazing! The poems and riddles are engaging and keep you guessing until the solution is presented. The action bits are usually fast pace and make you want to jump up and down in hyper excitement. The characters are well rounded and the villains are all deliciously evil. This series is perfect for fifth graders and up. The only problem that I have with this series is that the plot lines are all very similar to each other, therefore, I give this particular series four stars.
