Weeping on Wednesday

Ann Purser

Weeping on Wednesday Ann Purser

It's all smiles for the series that sweeps up sales-every day of the week. Working mum and owner of a cleaning business, Lois has just hired on the daughter of the Abrahams, an eccentric, reclusive family. But when strange letters and omens put everyone on edge, Lois wonders if the rumors about the Abrahams are the key to a terrible secret.

Marci says

SPOILER ALERT I really did not like this one, I thought the killing of the animals was somewhat gratuitous. I could not like any of the characters and none of them were very well developed. It seems like the only reason for killing the dog was to make the brother into a really bad guy, which I'm not sure that he really was. You don't go from small crimes to killing just like that. I don't think that the brother was any more messed up than Enid who seemed to show more anger when she kills the chicken. I've started the next book, and probably won't even finish it. The characters all seem to have taken on an angry edge in this book also.

Lindsay says

I found this book to be very flat. It wasn't very long so I thought that i could read it pretty quickly, but it was just blah and couldn't keep my attention. The main character Lois was still a grouch and the author has been watching to many mystery shows. This book kind of felt like it should be turned into an episode of Murder She Wrote. Heck, maybe it was and the author stole the idea. Not really sure if I'll continue to read the series.

Lalla says

I really enjoyed this book though I found it darker than the previous book in this series that I read. The story kept me interested and wanting to know what was going to happen next. The characters are interesting and well drawn by the author. I am looking forward to the next one and determined to read them in order.

Maggie Kiely says

Book 3 in the series and an easy to read book of Lois and her cleaning company solving a mystery. No big drama's in these books but relaxing read with interesting characters. Would recommend.

Lisa says

I had to read this book in the series out of order (which I hate to do) because my library didn't have it. I'm to the point in the series now where Lois Meades kids have grown up and left the house. Now that I've gone back and read an earlier book I've found I prefer it when the kids are still at home. Lois juggling being a

mum, owning her business and detective work adds something to the story that is missing once the kids leave home.

Something else I've noticed with Ann Pulsers books, is she doesn't always tie up all the loose ends when the book ends. Sometimes I'm still left wondering about things. Like in this book there is a question about the Enid's father that is never answered. But it doesn't really matter because the journey is more interesting than the end.

The Bookish Hooker says

This is by far my new favorite series. I love that Lois Meade cleans houses for a living. What better way to find out all the tidbits of gossip needed to solve an investigation than by being involved in people's day to day lives. It makes all her inquiries seem plausible, which is more than I can say for some cozy mysteries. I'm looking forward to catching up with Lois and her team of cleaners/detectives in more to follow.

K. East says

This third book in the series is easily the best of the bunch so far. The characters have been established in earlier books and this mystery, while not as suspenseful as others, was a much better bit of writing and storytelling. As Lois' business grows, the interaction of the growing staff has served to make the novels more complex and thus, more interesting.

Jan says

Village cleaner Lois Meade helps solve a mystery surrounding an old mill and the secretive family who lives there.

Carol says

I enjoy this series and its cleaning lady turned crime solver, Lois Meade. And living in a small town is nice because you can always find someone who knows someone etc who can help you out. In this story I loved that Lois gave Enid a chance and the others in her cleaning service did the same even though they didn't like her. I like the family story that always goes along with each mystery too because that is real life!

Yeva says

I've enjoyed this series so far, and I've bought the rest of the books in the weekday series. The main character, Lois, is one that is not always easy to identify with, and that makes the stories all the more enjoyable. She's not just your nice little cleaning lady turned sleuth. She's more well-rounded, because she's many things to many people. She's businesswoman, boss, wife, mother, daughter, and friend. All in all, I like this series, and this book was good. The story moved along really well, and it was a good read waiting at the

end of the day.

Cathy says

This is the 3rd in the Lois Meade cleaning services mystery series.

Much of the story was engrossing and it ends without us knowing conclusively which person committed the murder, although I have a guess. I liked the Enid character, although at times she seemed a little bland, and her family relationships had gotten out of control.

Although a character (or two) commented on the solidness of Lois and Derek's relationship, it didn't seem that solid as inner details unwound. Derek could have spoken with Lois sooner and saved them both a lot of trouble. Also, when Gran suggested that Derek was more used to Lois's support than she could currently give, Lois reacted in anger, rather than considering whether there was any validity in the comment and facing the issue together unitedly with Derek - working through the problem together jointly to something in which they could both be contented. They did, however, come to a consensus on the real, underlying issue and the ways they would address it. So maybe they "got there" even though they took a harder route than necessary.

As a side note, the vet compares and equates euthanizing animals with euthanizing humans.

Another book borrowed from my mother-in-law.

Jill says

This one was refreshing as it is a cozy mystery that didn't center around a murder! Still a good read, though, although not as compelling as the first.

Jodi says

When I'm stressed, tired, or otherwise not very "brain-functional", I relax by reading cozy mysteries like this one. Compared to many cozies that I have read, this one was well-written, had a good plot with plenty of twists and turns, and good character development. It's always a plus for me when the location is in Britain, so that added to my pleasure in reading this book today. I'll definitely be reading more in this series.

Lynette Caulkins says

I enjoy easy read mysteries like this every so often. This story has the tone of a Midsommer Murders tale, without quite so many murders. Don't expect high literature here - we're talking grab a book for a nice read in a hot soak or curled up in your favorite nook during a rain storm. This volume in the series did start out a little distractingly for me, because it had several grammatical and editing errors up front. Fortunately, those evened out and the story line sucked me in beyond the initial irritations.

Dawn says

I checked these out from the library and am continuing to read them even though they're not the best because they're pretty quick reads (and I've yet to make my return trip to the library to get something else). It's been tough to like Lois, she seems totally crabby at times, turns nasty on a dime, it's just weird. And the detective is so secretive and of few words, it's hard to imagine him as a real cop putting someone in those spots without much info, it's just not believable. I'm getting through the few I have and will call it a day with this series.
