Her riches run low when her father dies. Sabrina decides to travel to America. Sion finds himself in prison when he tries to help Sabrina. She gets him out by making him an indentured servant. Together they travel across the ocean to a new home.

The journey across the Atlantic Ocean reminded me of my Navy days. As was in the book, the waters were choppy and also like in the book I became seasick. (But not to the extent of Sabrina.)

I loved going back in time. Stagecoach ride, wagons, and horses. The journey was hard. The skirmishes with the Indians and unlawful men made it tougher. Yet, the spirit of the early pioneers pressed on.

Sabrina's character changed considerably from the beginning of the book. Hard times can do that to a person. I loved this book. The only regret: It's the last one in this series. I'll miss the characters and the adventures.

#### **Shelby, Village patron, June 2017, 3 stars:**

Sabrina Fairfax was a pampered and spoiled only child of an English father who loved to gamble. When he lost his fortune and then died with a stroke, Sabrina was devastated. She met Sion Kenyon from Wales one dark night on the street when she was attacked by two men, one of which was a lord. Sion rescued her and was sentenced to prison for striking the despicable lord. Sabrina saved him from prison by indenturing him and taking him to America to help her find the land in the new world her father had left her. They traveled to what is now Tennessee, and met some helpful Americans. Only when Sabrina was taken captive by hostile Indians, and rescued again by Sion and others, did she free him from the indenture so he could marry her.
