Planning a road trip and this book has some beautiful areas I'd like to see.

A collection of interesting drives across the planet from the folks at National Geographic. A handy guide includes not only the trip, a brief description but also the highlights of each drive.

This is a good coffee table book with excellent photography, but is very thin on information for people who may actually drive some the routes described.

As you would expect in a coffee table read the information is presented thematically, with no attempt to provide a geographic finding aid which would be useful to narrow down trip locations beyond the entire planet. Maps are small, and little detail is offered about food, accommodation, weather, local politics, or even where to locate a vehicle.

Driving any of these trips would take considerable additional research. In areas I am familiar with I noticed that some of the authors are quite happy to subject themselves to huge stretches of interstate or bald prairie that many will describe as mind numbingly dull.

This is a pretty book which might give you an idea about a trip, but as a tool to assist people actually considering the drives, a reader is left with more questions than answers.

A beautiful guide, done in typical National Geographic style.

Lots of gorgeous photos, florid travel brochure-like summaries of the drives and sights to be seen along the routes, tiny little maps of the route and an even tinier map of the route area placed within the country. Little information of real value to folks actually planning these drives.

I would say this book would be a starting point for further research to those with pots of money to spend, or those who love to imagine themselves with pots of money.

Great vivid pictures that feature popular routes. I enjoyed seeing the miles and time lapse on the road trips. Definitely a coffee table/adult wishlist of places to visit.

### **Elaine says**

I certainly enjoyed thinking of the places I want to go.

### **Tim says**

a good book in the "national geographic" lifetime travel-book series, with a heavy dose of american routes.

Some intriguing trips. The places I have been are described pretty accurately. Lots of places worth visiting.

another coffee table book one browses often but this one actually has a lot of cool ideas for driving (and I actually did a few drives mentioned there from Italy, Austria, Switzerland and Germany from the book, and a bunch from here in the US before actually reading about them in this one, and plan to do more as opportunity arises); excellent stuff with tons of inspiration for trips - has a companion with 500 journeys of a lifetime but this is better imho (if you are a fan of driving in cool places of course)

A fun book with lovely pictures. It's like a wishbook for road trip loving adults! However, I question some of the choices, as I have driven some of the routes and some I personally thought were amazing got only honorable mentions, and others that I didn't think were that great were featured. A good example of this is Alaska, where the Denali "Highway" a long, remote, washboard-rough gravel route that we didn't find to be that spectacular was featured above the Richardson Highway which was amazing. Hatcher Pass was probably the most unbelievable road I have travelled and it and wasn't even given a mention. But that's just my opinion I guess. Overall it has some really amazing routes I hope to travel someday.

It's a pretty book and fun to look at. The pictures are gorgeous. The descriptions are fairly minimal, but they do tell you what's along the route.

I'll never go to 99 percent of the places described, but that's okay - I can dream.

While I only jotted down 38 of the 500 trips that I (realistically) want to take and will, the book itself is a wonderful journey.
