I was given this book last September and I am compelled to read everything I am given. I found it somewhat refreshing. Talking about the good we can do for the world. This quote was my favorite: "Focusing on what will come causes you to neglect or avoid being really attentive to what is actually happening." I have been known to do that. Great reminder. I like the CD that comes with it too - especially the song: "Love, Peace, and Harmony".

Didn't get through this one. Have to accept drinking the kool-aid from the get go.

Soul Wisdom can serve as a resource for those who choose to follow the mind, body, spirit path. It offers a way to find your soul's language and your soul's song.

What a disappointment. This is not at all what I expected. I couldn't even finish reading this. From what I did read none of the authors experiences are based on truth. Nothing can be proved or is documented. The reader is treated like a idiot. Am I really supposed to believe that a "Divine Download" is embedded into the pages of the book? All I have to do is read them & I will receive the "Download" if I'm ready? Then I will be healed? This isn't soul wisdom it's hogwash. I recommend this to no one! I thought this would be a book on meditation & self healing. Finding inner peace etc. I suppose that this is what is supposed to be about but I can't find healing when reading repetitive pages of pure BS!
