America is caught in the lethal center of an unwinnable two-front war -- in this gripping and explosive thriller from the master of geopolitical intrigue . . .

The war on terrorism has borne bitter fruit, as the radical Islamic states forge an unholy alliance with a surging China, aiming for total control of the Middle East's vast oil reserves and the strategic Strait of Malacca. As a new axis of world power simultaneously launches a devastating double-pronged conflict -- one a depleted American military cannot possibly win -- President Maddy Turner, the first woman ever to occupy the Oval Office, must react swiftly to a global crisis of world-altering proportions. And so she turns to the only man she can trust in the brutal snake pit of Beltway politics: Brigadier General Matt Pontowski. A brilliant flyer and military tactician, and the intimate confidant of the most powerful woman on Earth, he must now undertake a mission at once bold and extraordinary -- and potentially suicidal -- as a desperate nation confronts Armageddon, and its leader approaches what will be either her finest hour . . . or her most tragic mistake.

### **Jim A says**

Three stars is a stretch, but I gave them anyway.

Story of a 'throw away' group of pilots and support personnel doing battle for Singapore against the PLA (Chinese army). Those who have read War Birds will recognize the basic plot, only in the jungle instead of the desert.

This book was actually better than I thought it would be. Iran, Iraq, and Syria combine forces to create a new Islamic state and invade Saudi Arabia in a bid to control most of the world's oil supply and cut the United States off at the knees. Meanwhile, China attempts to gain control of the strategic Straight of Malacca. The United States military has been pared back so much that it will have difficulty in dealing with both situations at once, so it moves the majority of its forces to aid Saudi Arabia and a token force to help in Malaysia. By the end of the book, things are obviously made right.

(view spoiler)

The political situation is that the former female VP is now the President. Her political opponent is a scumbag [as all political opponents are]. The French are complete and utter jerks [shocker!]. These two flashpoints are occurring during an election year and the new President has to decide what is more important: attempting to win a war or win an election. A potential scandal could potentially disrupt the election for the sitting President.

The political situations were okay, I guess. Sometimes it seems like authors go out of their way to make a political opponent a jerk, a demon, or whatever else you want to call him [or her]. And then something happens in 'real life' that makes the demonization seem not quite as far-fetched.

Apparently there was a character from Dark Wing who makes his appearance in this book. It has been several years since I read that book, so I don't remember the character. He is a former US SpecFor warrior [ex-Army, if I remember correctly] who lived in Malaysia until his family was murdered by the Chinese. He seeks retribution, is given command of a highly touted Malaysian Special Forces group, and harasses the Chinese all in the name of justice [vengeance] for what was done to his family and home.

It was a good book; I enjoyed it a lot more than I thought I would. The pacing was about right; I wanted to finish the book and did not grow bored reading it. It was an interesting concept, on the one hand. It showed the importance of allies and nations working together for a common good as well as certain chokepoints and potential flashpoints. In my opinion, the undercurrent of the book deals with the cutting of the US Military to bare bones so that it is no longer able to deal with more than one regional threat at a time. Tom Clancy wrote a novel along these lines about twenty years ago [Debt of Honor] so perhaps this concern is not as great as some fear. On the other hand, it might be. Anyway. It was a good read.

#### **Great read & very realistic!**

I read military fictional books frequently, and have so for years. This book REALLY have me the best understanding of all that goes into the strategic and tactical aspect of missions, and I actually teared up while reading the epilogue. It has great characters, and is a terrific read. I really enjoyed reading this book, and am starting another Richard Herman novel. Highly recommended!!!!!!
