Bradley Shelton says

this is a very good book have read where they are going after a suitcase fill of money has been stolen by the Nazis and the are hiding it at one of there penetration camp in France some where so they have the special operations must act fast before the Nazi give it to Hitler the group of train professional have to act fast they are lead by Sargent walker

I have now finished this book the most interesting thing was when they were fighting the German forces to win the battle between the Americans and the Nazi force

and the most unusual thing was at the start when they were describing how the place looked and the characters of the book

7l2 says

‘Special Ops: Dead or Alive’ is the 4th book in the series of ‘Special Ops’ books by Craig Simpson.

In the book, three kids go undercover in Nazi occupied France to find a Special Ops agent that went missing with a briefcase full of money!

My favourite part of the book is quite early on where the agents had to sneak into the Nazi generals’ office to forge a letter from him.

The book can be as funny as it is serious and I recommend it to anyone that likes World War II and/or action books.
