Ginger is back, and her mouth is as unfiltered as ever...

Ginger Perry, Harper's star witness in her previous murder trial, left Kansas City for the greener pastures of the Los Angeles adult film scene. As soon as she gets out to the West Coast, however, she catches a case. A big case. A murder case.

The victim is a powerful studio head. Ginger insists she was framed. Harper's not so sure. She wants to give Ginger the benefit of the doubt, but Ginger's always been a little shady. Nevertheless, she agrees to take the case. After all, she hasn't had a vacation in years, and a trip to Los Angeles is as much of a vacation as she's ever going to get - even if it's not really a vacation, but another murder case. Harper knows that she needs another murder case like she needs a hole in the head, but she just can't resist a lost cause.

And Ginger's case seems to be as lost of a cause as you can get.

With the twists, turns and lightning-fast pace you've come to expect from a Harper Ross Legal Thriller, L.A. Defense is not to be missed!

### **bonnie kirchner says**

#### **L.A. Defense**

I did not enjoy this book lik the others in the series. There was no suspense and thrills like there was in the other books in the series . Hope the next book is better.

### **Barbara Wilson says**

#### **Harper Ross is in a bit of trouble.**

This book moved along at a nice pace with many interesting characters. Looking forward to the next book by Rachel Sinclair in the very near future.

### **Caywood says**

#### **Tedious writing, great story**

If you appreciate good grammar, consistently correct use of verb tenses, development of scenes through architecture, color, and historic detail, find another author. While a good story line exists, the overuse of unnecessary words such as that, actually, kinda can actually kinda drive ya nuts.

### **Mabel says**

L A defense was a pretty laid-back story compared to the things that Harper gets caught up in. I like to see Harper keep her sobriety I think that takes away from all the great work that she does because she is always finding that needle in the haystack.

### **Chaplain Stanleigh Chapin says**

#### **Difficult to read**

There were way to many inconsistencies, which caused .unbelievably. Needed good editing, poisoned drink went from Scotch to Vodka Tonic and back to Scotch
