Out of Bounds Lani Woodland

This is an alternate Cover Edition for ASIN: B00TB6CP5W.

At the end of her junior year, Jackie Sawyer ended her lifelong friendship with Jordan when her unrequited crush on him became too painful. And thanks to the district's school boundary changes, Jackie is getting a fresh start as a senior. She's ready to make new friends, get her first boyfriend, and put Jordan behind her. Only there's one problem: Jordan is at her new high school. How can she move on when she sees him every day?

Jordan Knowles used to have it all. He was the starting quarterback with loads of money, Jackie for a best friend, and a gorgeous girlfriend, Anna. Then last year it all fell apart, and his family had to trade in their ritzy estate for a crappy apartment. The one bright spot of moving is the chance to go to a new school without Anna or Jackie. But on his first day, not only is he warming the bench, but he finds the two people he most wanted to avoid. Seeing Jackie reminds him that he really misses his best friend. More than he wants to admit.

Though part of a series and tied to *Breaking Pointe*, it can easily be read as a stand alone.

Bonnie says

A cute read, but I still loved it!

Deborah says

You know life is good when a friend creates a whole book shelf of books you would love and therefore cuts your time in half for trying to find a good book. :)

This book was so adorable. I really loved the main characters and I loved their friendship. The opening scene with the locker moment was classic. I love when we meet our main characters right away instead of waiting through out the whole first chapters.

So glad I picked this one up!

Kathy * Bookworm Nation says

I enjoyed this one. I usually enjoy this kind of plot, where the main characters have been friends for a long time and are just realizing that maybe their feelings run a little deeper. In this case, Jackie has been in love with Jordan for years. She finally admitted her feelings and he shot her down. They spent the summer apart and are thrown back together when school starts up again.

Jackie was a likable heroine, I like that she was nice to everyone and made friends easily. I also liked that she saw through the jerky guys and could hold her own. I was a little surprised that she didn't get more upset when she found out that Jordan had been scaring guys away from asking her out. I kept waiting for their to be a confrontation about that. He was WAY out of line to do that, especially without her knowledge. I guess that just rubbed me the wrong way. I did like Jordan, but I found myself not really rooting for them to get together. I was for most of the book until Colton entered the picture. I LOVED that Colton took one look at Jackie and knew she was worth getting to know and he didn't hesitate to ask her out. They had great chemistry together and by that point I was kind of hoping she would fall for him and get a fresh start. To be honest, I felt like they had more of a romantic connection than Jackie and Jordan. Maybe since so much focus had been on them being friends that all I saw them as. I think Jordan should have stepped back and let her date and experience that. I knew going in that *eventually* they would end up together, so by time that happens I was happy for them. I think with everything Jordan was going through also made him look at his life and realize what was really important. He had always taken Jackie for granted and not having her around for the summer made him realize what he was missing.

Overall, it was a fun read. There are some heavy themes, Jordan dealing with major life changes and his mom having cancer. Jackie wanting to locate her birth family. The book was light though, I didn't feel that those elements were too heavy or dwelled on overly much. I enjoyed reading about Jackie and Jordans journey. I need to go back and read the other books now.
