"Cutie," he breathed, his lips lowering closer to my own. My breathing hitched as I felt my body start to go limp. His face was so close to my own, I could practically feel his lips brushing over mine while he looked into my eyes with his intense stormy ones.

Then he smirked with his trade-mark smirk.

"You are seriously the most gullible, and naïve person I have ever met."

○●○○●○○

Our ex-popular Julia Hayes is bullied by Ashley Power - a girl she would have, at a time, called close enough to be family.

But something changed between them last summer, something that Julia didn't mean to happen.

Now, Julia has to deal with the wrath of her former friends led by Ashley.

Does she talk back?

No.

Does she tell anyone?

No.

Does she fight back?

Absolutely not.

So, what is she supposed to do?

Well, she is perfectly fine with just letting them get away with it for the rest of senior year.

But now, there's one person who's NOT okay with letting that happen.

Enter in, the school's newest Bad Boy.

Chance Gold.

Chance has seen her get picked on by Ashley Power, more than once. And him - being one of the best fighters in the school - decides that he doesn't like the fact that Julia never fights back.

So, he takes it upon himself to teach her to fight.

What will happen when you mix a clueless good girl and a head-strong bad boy?

Only time will tell...

I'm quite having a blurry memory on this one (in some scenarios), but I'm sure as hell that this one's one of my favourites on Wattpad 'cause it's still on my finished-reading-reading-list for favourites.

I really enjoyed this book. Julia AKA Cutie, was so sweet and kind-hearted, it was refreshing to read. She went through so much and she still remains so strong; accidentally killing her best friend, Chloe, in a car accident, bullying at school, neglect at home, being adopted, almost losing Chance, and losing her brother at the end.

I'm glad that she finally got a happily ever after when she punched Melissa and got to be with Chance, because she worked so hard for it and she deserved the world honestly. Even when Melissa was trying to beat her, she pinned her down and didn't punch her, because she felt bad. She's such a sweetheart!

I couldn't help but feel like she liked Chance a lot more than he liked her though. When it was in his point of view when he was trying to comfort her because she was crying, he didn't even realize he liked her and she was already madly in love with him. She fought against Melissa, an extremely dangerous woman who knocked her out once, because she wanted to have Chance again. When Chance was getting beat up by thugs, she ran in the middle and tried to punch the main guy, resulting in her getting punched in the ribs and kissed forcefully by him, but she didn't care as long as she saved him. When they took a 'friendship' break, she immediately fell into depression and when he came back because he wanted to know what was wrong

with her and she told him she missed him, he said that was too sappy for him and they started training again. She cared a lot more for him than he did for her.

This is a really unpopular opinion, but I DON'T hate Ashley. I know we're supposed to because she bullied Julia, but after I found out the reason why she did it, I felt bad for her. That doesn't mean I am excusing what she did, because it was in no way justifiable, especially when she burnt Julia's hand, but I feel bad for her. The whole reason she bullied Julia was because Julia was drunk driving and ended up crashing the car resulting in Chloe (Ashley's twin sister) dying instantly. She just missed her sister and in the end, she made amends with Julia again.

Overall, great book. The characters were mostly likable, except Melissa, Julia's mom, and sometimes Ashley. Great plot and it isn't always predictable, especially when Jason was taken. I was not expecting his dad to come back for him at all. I highly recommend it for teens looking for a comical romance.

4.5 stars loved the storyline it was definitely a book that you can't put down!

The author also gave updates on the characters futures at the end of the book it was kind of cool to read that especially when you become invested in the story and don't want it to end.

My .5 deduction was for Julia I know she is supposed to be a pushover but at times she was definitely a doormat, it just didn't sit well with me
