## To The Medicine Bow (Buckskin Chronicles Book 5) B.N. Rundell

Sometimes in life, the shortest distance between where you are and where you want to be is not necessarily the best route. Life often takes you on a much longer trail before you reach the goal you were destined for, and this circuitous route usually has valuable life lessons. These are the lessons that littered the path of the lives of Clancy and Caleb as they fled from the sorrow of the mountains and searched for answers in all the wrong places. Thinking the big city would provide refuge and salve for painful memories, they learned where ever they went there were new lessons to learn and memories to be made. With both having a love for the mountains and the often solitary lifestyle, the pull of the city would not readily release its grip but they would have to chart their own course.

With an opportunity provided by new found friendships and the possibility of a new direction for their lives, they seek to return to the mountains to find their own nirvana and a new beginning to establish their home and their legacy. The shining mountains and green valley of the Medicine Bow range that nestles in the Southern most part of Wyoming territory beckons them and the promise of a new life gives hope where there was none. Now is when they find out if they have the strength and stamina to build a new life in the mountains of the Medicine Bow.

I like the way real people and events are woven into the story. This may be my favorite in the series so far. Caleb and Clancy leave home and end up on a new journey.

The characters are still just a bit too perfect, and there is too much preaching throughout the book, but the storyline is great.

**I have thoroughly enjoyed this seeking wonderful heartwarming series of astonishing stories of family-friendly episodes of the real old west. The author, Mr. Rundell, has the uncanny ability to always provide the most rewarding and exciting adventures of the old western experiences that seems to reach and fill my heart with a rapture that is forever completely fulfilling. The trails may be tough, and somewhat dangerous, but the anticipation of what thrilling episode will occur next is worthy of following the next unknown trail that Caleb carried us on.**

Most certainly a five star excursion to be enjoyed by everyone that will pursue Caleb and his new found family in seeking their established trek to greatness. This group will touch your heartstrings throughout their many exciting adventures, and they will certainly provide family-friendly entertainment throughout the entire book.

I continue to be impressed with the author's prolific storylines and his uncanny ability of character selections! There is never a dull moment throughout their many different encounters, as they are always defending someone, or, are looking to improve their current situation. Very, very heartwarming stories in this magnificent series of old western folklore!

Definitely recommend this book, and series, as I have been hooked from book one. You will be too! I was unfortunate and read several books out of sequence, but if you decide to follow these wonderful adventurers, please don't make that mistake. Read them in sequence.

## **Buckskin Chronicles**

What a great set of books these are. I have really enjoyed these books. Mr. Rundell knows how to hold your interest in his story. You are drawn into these books like you are there watching it in real time. I sure hope there will be more of these books on Caleb and Clancy. I would love to read about the baby and how they make out in there new home with the new family they picked up. Thank you Mr. Rundell for a great read.
