*Is he Prince Charming or the Big Bad Wolf?*

*Salvation Pack, Book 2*

Anny Conrad is a single thirty-year-old librarian—a cliché complete with two cats. Dragged out to a local bar, she's rethinking her life plan over a few drinks when a man walks up and asks her to dance. And what a man. Tall, rugged and more than a little untamed. Before she knows it, she's in his arms and throwing caution to the wind.

With a pack war in full, deadly swing, the last thing Armand LaForge needs right now is a woman in his life, much less a human. But one thing is certain, he's met his mate, the one woman in the world for him.

The kindest thing to do is give her all the hot sex she wants and then leave her alone. But when the morning comes, fate isn't done screwing with them. Anny is confronted with the fact that the myths in her library books are real...and now she's one of them.

Warning: A night out at a club can lead to a loss of inhibitions and hot sex with a werewolf. Your life will never be the same. You've been warned.

Wolf in Her Bed is the second installment in the Salvation Pack series. I found this installment more enjoyable than its predecessor. It recounts the story of Armand LaForge and Anny Connor. Readers were first introduced to Armand in Wolf at the Door. I fell head over heels with him and was glad when I found that he was getting his own story.

Armand is a wounded soul (physically and emotionally) and one cannot help but empathize with him. He, along with his cousins had defected from the Louisiana pack to form their own pack. Their defection was not taken well by their Alpha (Remy LaForge). As a result, they found themselves embroiled in a war between the packs.

Armand and his father (Remy LaForge) did not have a great relationship. His father is responsible for the physical and emotional scars that he is carrying around. Despite the physical scars Armand had the females falling at his feet. He is not keen on having any form of relationship as his main focus was avenging his sister's death. However, this would all change the night he laid eyes on Anny Connor. He knew from that moment she is his mate. He knew he should stay away from her for her own protection, but that was proving to be a difficult task. She affected him in a way that he never expected.

Anny is human and knows nothing of the existence of werewolves. She has experienced pain and loss and didn't know what it felt like to be loved and cherished. She has no one in her life besides her best friend Sue and her two cats. On the night of her thirtieth birthday little did she know that her life as she knew it would no longer be the same the moment she agreed to dance with a handsome stranger.

Their path to lasting love was not easy. Anny had difficulty trusting Armand's feelings for her as she found it difficult to believe that he cared about her. It's easy to understand why she would feel this way in light of how her parents treated her.

There was one thing I could not understand is why Armand would leave Anny unprotected knowing that his former pack members would be observing his every movement. As such anyone he came in close contact with and showed any interest in would be in danger. I simply could not wrap my head about that.

The conflict which was raised in the previous installment was partially dealt with, however, it would lead to serious repercussions for the pack which I am hoping will be addressed in the next book in the series.

Wolf in Her Bed is filled with passion, romance and there is danger at every turn. The story moved quickly and it had me engaged from beginning to end. This story shows how the struggle for power can lead to betrayal.

[ You've been attacked by a werewolf outside your house and almost died. You are currently under protection and your guy made sure your cats are ok. The bad werewolf obvious knows where you live and wants to kill you. So what does the woman do? Go back to her house -- by herself -- when she was warned the bad werewolf was still out there... Of course she gets attacked again. Too stupid to live! (hide spoiler)]

Letting a man you just met for the first time at a bar earlier than evening into your house when he appears unexpectedly at your door in the middle of the night, naked, just doesn't make me want to find out what happens next ... although I did tough it out to see if the story improved. Um ... it didn't.

Captivating from first page to last. Anny - a single Librarian goes out to celebrate her Birthday and meets Armand. Armand is a werewolf - who with his family (a group of other werewolves including his cousins and friends) - have started their own Pack The Salvation Pack. The book is hot!!! and full of action. N.J. Walters has become a favorite for me very fast. well written with a great story line.

Love this series. This is Armand & Annie's book. They meet at a bar, dance and immediately Armand knows this human is his mate. Armand leaves alone, but then goes to her house....because he can't stay away from his mate. After their night of passion, he stays away. Unfortunately his dad's a real d\*ck and tries to kill her. She ends up "surviving" and has a lot of questions.

Her life forever changes and she has to make a decision whether she's with Armand or not. To stay with him means she gives up her life as she knows it. Her best friend Sue and her son Billy. Very sad.

This is also the book that started my Gator crush.....the man cooks, enough said...dibs. Loving this series.

I am leaving yet another lame review compared to my normal reviews because I've waited too long since reading the book to write it, again because I was rolling straight through to the next book in the series as I devoured them.

That said, I loved getting to back track in the series and discovering just how Anny and Armand got together. I have enjoyed every one of Walters books that I've read and have been a fan long before I began reviewing for blogs, so while my review is not going to be all that helpful, it is nice every now and then just to devour a book or two and not worry about how to explain why I enjoyed it so much. If you are a fan of Walters' writing, especially her paranormal romances, then I expect you'll love *Wolf in Her Bed* as well. If you're new to Walters or are new to this series, I recommend you start with the previous book, *Wolf at the Door* because even though this one can be read as a standalone, this series is even more enjoyable when read in order - and that's being said by someone who started the series at book four and loved it.

I really like this Salvation series, I think it may be my favorite by N.J. Walters of whom I was already a fan. It has been a while since I've read one by her but it seems like the Salvation books are a bit longer which adds to the character development and plot so much.

The Salvation pack is a small band of wolves who broke from their violent pack in Louisiana led by Jacque and Louis' father. Now settled in North Carolina with their cousin Armand and friends Gator and Cole and newly human-turned-wolf mate of Jacque, Gwen. They continue to be at risk from their old pack and have survived two attacks knowing it isn't over until the old alpha is dead.

Picking up shortly where *Wolf at the Door* ended, Armand is still hoping for revenge on his father, brother to Jacque and Louis' father, who gave his own daughter to a man who abused and killed her. Out at a club one night he meets Anny, a shy school librarian celebrating her birthday with her friend Sue. They are instantly attracted (and he knows she is his mate) to one another and share a couple of dances and one hot kiss before Armand forces himself to leave, but he can't resist and shows up at her house where they spend the night together.

Armand plans to stay to keep her safe from the other pack though he can't forget her. Anny survives a wolf attack and is transformed (a rare occurrence supposedly but Gwen was in the first book too, but I'll let it pass since I like this story so much), she eventually seeks out Armand to find out what has happened to her.

Anny had a (small) tstd moment but can be excused because of the trauma she suffered and she is very likable. Armand is downright perfect, loved how sweet and tender he was with her.

I like how the author includes the other characters in the story and the more I get to know them the more I look forward to their stories. Coles is next but Louis & Gator's are not written yet. (Dare I hope one of them will wind up with Anny's friend Sue?).

Definitely recommended.

Annie and Armand aren't your typical hero and heroine. Annie is a quiet, easy going teacher who goes out with her bestie for her birthday. Just as she is ready to leave Armand one of the guys that lives outside of town asks her to dance. He is tall, dark, gorgeous even with the scars running down his face. Armand knows he should leave but Annie smells so good that his wolf just has to hold her. They dance and then share a hot kiss before parting ways. She goes home then is pleased when a knock at her door brings Armand. What ensues is passion that shakes them both, he knows she's his mate but must leave her alone or his former pack and his sicko dad will use her to hurt him.

Totally enjoyed this book! I'm hooked on the Salvation Pack!

So book 2 in the series Salvation Pack, Wolf in Her Bed, was an ok read for me like the first one.

This time around was about Armand. He was as nice and sweet as in the first book but a little dumb when it came to his mate.

He met Anny in a bar, danced with her, followed her home, spent the night with her and left her the next day. All his good intentions were shot when his own father took it upon himself to kill Anny. Well, he didn't succeed and Anny became a werewolf.

From this point forward the story between Armand and Anny picks up. He behaves like all the werewolves lovingly towards his mate but Anny, because "she is/was human" not so much.

So, Anny's attitude didn't go well for me because I am so over the whole "being human she cannot feel/know" that they are mates. It's most of the time one sided and leads to repetitive actions and thinking (should not be there, should go away....but it feels right).

The intimate scenes were so long that I started skipping to be able to go to the main parts. It was like I am reading the first book's parts. Even Anny's actions and thoughts were repetitive going through the motions of being there with Armand or not even though she jumped to "i love you" quite fast.

The secondary characters Cole, Gator were sweet and nice and had a great relationship. Louis continues to lack any traits and that is sad.

I don't like when the book doesn't feel unique and the characters follow the same steps/ action as the others.

I might be in minority here but after so many books read I have limited patience for repetition and copy paste.

I will however pick up and read the next books in the series because I like the secondary characters and I want to read about their HEA.

Ehhh... 3 - 3.5 \*'s.

Hero: 4

Heroine: 3

Storyline: 3

Steaminess: 4

Angst: 2

It was good, but the first was better. I felt this one was more formulaic and predictable. The sex and chemistry between Armand and Anny was hot so that was a plus. However, Anny annoyed me. I really liked Armand in the first book and that carried over into this one. The story line just wasn't there for me.

One thing that I liked about the first book was the secondary characters and their love for one another. I didn't feel like that with this one. Gator and Cole were like themselves in this book, but the sense of family wasn't there for the pack. I thought Jacque was kind of an ass when he should have been supportive and understanding. That really bothered me.

Even though this book fell flat for me, I will continue to read the series. I'm excited to read Cole's story!

On the day of Anny Conrad's thirtieth birthday, she realizes that her chances of a husband and family are fleeting. Anny is turning into a spinster, she is the epitome of the librarian with cats and closely becoming a spinster. When her friend takes her out to celebrate her birthday, it has an ending she never expected a dance with a stranger that leaves her reeling.

Armand LaForge knows he is wound tight, he feels partially to blame after his alpha's mate was attacked. He is driven to protect his small pack and even though they sense he is in turmoil, he decides to take some time just for himself. He never expects to meet Anny, he realizes she is his mate but as a human he can never have her. His wolf feels otherwise though and he promises himself one night and it is electrifying, but at no time does he realize he has put Anny in danger.

I don't want to reveal too much but this was a phenomenal read. Unexpected and it left me eager to read more in this series. Have been a huge fan of N.J. Walters for awhile and she never disappoints. Armand is the beast and Anny happens to be the unexpected beauty, he is so protective of her even when he senses she is reluctant to hand over her trust. Wonderful story.

You see each other across a room and the attraction is electric, all you see is his eyes and all he sees is you. It's your birthday and if you could have one gift it would be this man, this beautiful man across the bar. In the second installment of the Salvation Pack series by N.J. Walters we get a more in depth look at Armand LaForge and his mate Anny Conrad. Little do either know that the one chance encounter on the night of her birthday would lead to a action packed, life or death experience that ties them together for life.

Armand is inexplicably attracted to Anny and finds that he can't stay away and gives in to one night of singe your eyebrows passion. In that one night Armand realizes that nothing or no one will ever make him feel like Anny however he can't have her. Armand does not realize Anny is his mate but he knows that he cares and will protect her from his former pack; unfortunately his being honorable does not save Anny from the evilness that is his father and second in his former pack.

Anny is attacked and hangs near death and she has no understanding of why. As she heals she realizes she must seek out Armand for the answers. Anny is feisty and Armand is all alpha-male they are bound to bump heads and when they do it's quite entertaining. The ultimate question is will Anny and Armand survive the threat of the Louisiana Pack to really make a go at a life together? Will love and honor bring them together (with a little bit of a nudge from the other pack members) or will all these changes in Anny's life keep her from accepting and love Armand. I would love to tell you but I won't spoil it for you my dear readers, get this second installment and enjoy yourself.

I am anxious for the rest of the pack to get their HEA's. I have always enjoyed N.J.'s paranormal series because at the core of each she reminds her readers to be strong in the face of adversity, have honor, to fight for what you believe is right and sometimes different is not bad but very exciting and worthwhile. The character and story development is great and you will find yourself falling a little bit in love with each member of the pack. Once again N.J. Walters has delivered a great escape for her readers in her writing of the Salvation series; *Wolf In Her Bed* gets 4.5 stars.

Anny Conrad is the typical single librarian with her two cats. So when she is dragged out to a bar by a friend, Anny decides to live on the wild side at least one night when she meets a man who makes her tingle from her toes to her nose and, most importantly, those hidden places in between. All Anny really wanted was one hot night of sex that she could pull out on those nights in the future when she is cold and lonely. This decision is one that will change Anny's life in ways she never expected.

Armand LaForge is a member of the small Salvation pack who decides to grab a beer at the bar on his way home one night. But when a woman attracts his attention and his inner wolf says that she is his mate, Armand is now fighting his instincts that say claim her and never let her go. His pack is in a pack war right now, and a human woman is the last thing Armand wants to be dragged into it—especially when she is his mate. So, he decides to allow himself one hot night and then to walk away from her in order to save her. At least that is his plan, but when the night is over, his wolf isn't happy, and it seems that maybe their night isn't as secret as he thought.

Anny can't believe she really did have sex with that hard, hot guy from the bar, but when she is attacked and almost dies, she realizes that he is the cause. Anny demands answers from him. Armand is shocked to see Anny on Pack land and even more shocked by what his nose is telling him. Explanations on both sides reveal truths that bring shock, disbelief, and rage, but the confrontation allows Armand to finally claim his mate.

However, that depends on whether Anny will believe she really is his mate, and that their attraction and love is meant to be. But before that can happen, Armand is determined to destroy the threat to Anny once and for all, so she will never be hurt by that wolf again.

A lonely librarian and a lone wolf find out that love can happen even when horror attempts to destroy it before it can really be found in *Wolf in her Bed*. I could totally understand why both Anny and Armand indulged in their night of passion. I loved seeing how Anny took her life in both hands after her attack, and how Armand took the circumstances and claimed his mate while planning to protect her from further horror. Watching as the entire Salvation pack helped Anny come to terms with her new life had me knowing that Anny and Armand's life would be full of love and friendship even while the pack war rages on. *Wolf in her Bed* takes the horrors of a pack war and the wonder of love and mating, mixes them up, and proves that love will always win that battle.
