### **Markhiller says**

Great book for us older climbers who remember how great a climibng Wolfgang was. Includes great pictures of some real testpieces that though were climbed 20 years ago are still legendary today.

### **Jonas Wiklund says**

Wolfgang G  llich belonged to the first generation that approached rock climbing as professional athletes (a generation that also included Jerry Moffat, John Bachar, Lynn Hill and a few others). For raw power, Gullich undoubtedly led the pack. This is his story, told by his friend Tillman Hepp, a former editor of the (now defunct) German climbing magazine 'Rotpunkt'. The German original edition was published within a year of Gullich untimely death on the auto-bahn.
