## **Excavated** Noelle Adams

Lucy has more than enough in her life to juggle. With a failed marriage, three broken engagements, a popular ghost-hunting show, and a Bichon Frise, she doesn't need any more complications. So when she heads to the Orkney Islands to investigate and film a prehistoric site, she doesn't expect to be confronted with the man who broke her heart in college. She also doesn't expect to still be irresistibly attracted to him.

Philip has devoted his life to his career in archaeology, and he doesn't appreciate being forced to entertain a nitwit ghost-hunter on his dig site. But when he discovers the ghost-hunter is Lucy, his controlled, driven existence suddenly spirals out of control. A week of hot sex might be a reasonable indulgence--given the circumstances--but anything more than that is strictly off the table.

They have far too much history between them, and it's just too hard to dig it all up.

Excavated is a sexy, contemporary romance novella (35,000 words).

### **Kim says**

This story started out with promise, but bored and annoyed me by the end. Lucy's entire grudge against Philip is pretty dumb. I get that she feels betrayed, but it honestly wasn't a betrayal. It was two people who grew apart. That's life. And with these characters in their 30s, it gives them the aura of immaturity that they don't understand that.

#### **Didn't grab me**

The premise was interesting and I was actually interested from the very beginning but some of the scenes didn't fit together right and there seemed to be too much mystery around their past without as much resolution as I was hoping for. The end was very satisfying but the middle was hard to get through.

Where to even start with this one... in a nutshell, it was awful. Not just plain awful, but cringeworthy awful. The hero and heroine were 30-somethings that acted like they were 12. The whole schtick was that Lucy was pissed at Phillip because he, \*gasp\*, couldn't read her mind when they were in college while she was madly in puppy love with him. Seriously. She never told him, he was just supposed to figure out out. Of course he didn't, because he's a man. So this was just 200-whatever pages of pre-teen 'I'm going to cut my wrists before giving you the time of day' angst. Oh, but I'll have shit tons of really awkwardly written sex over the next 8 months with you just because I can, but still hate you for NOT taking advantage of me in the process. Ugh.

#### **Loved it**

It took some time for me to get into it but once I was I couldn't put it down! I love all noelles books!

This was a quick and steamy read. I loved how the story played the trope of resurrected passion, and very much enjoyed the heroine's display of sass (*obviously*, the outrageous outfit is an audience bait). Some scene transitions were awfully fun to read, too.

Philip and Lucy have battle-hardened wounds of past failed relationships, and I appreciate the way they got

over their reservations of falling into a new one. When their one-day-at-a-time arrangement is shaping to be a commitment that Philip wants to pursue, I like how he turns from cool to earnest. I just find Lucy's decade-old reason she's reluctant to trust Philip a bit hard to swallow, if not anti-climactic. I may have hissed a bit, heh.

I so so so love this exchange at the end, though:

"When did you get to be such an expert on commitment?"

He smiled as he lifted his head to gaze down at her. "Are you serious? I've never had a problem with commitment."

She thought about that for a minute and then seemed to realize he was right. "I guess your problem was finding the right thing to commit to."

Right-o.

I am between 3,5 and 4 since i will read anything from the author!

That was a fun and quick read. It was actually one of those times that the female protagonist was hitting on my nerves instead of the male. While Philip was all right with his feelings and more stable Lucy was so unsure more of the time. Every time I was reading the "I don't know" I wanted to slap her hard!

But still fun as always!

### **Heidi Dover says**

Pretty good novella. Liked the characters and the setting, enjoyed overall. A little skimpy on the background, and really skimpy on her reasons for being mad at him - waaaay OTT drama reaction for how their past was set up, really skirted the suspension of disbelief line. But, overall I enjoyed and wanted their HEA.

#### **Touched my heart**

Noelle Adams has created personalities for her characters that grabbed my heart. The intensity, drive, strength of character and vulnerability of both Phillip and Lucy makes me want to know them even better.

#### **An entertaining and heartfelt book**

This book was a wonderful story about Lucy and the man that hurt her fourteen years earlier. He is now an archaeologist and she happens upon his dig while preparing for her web show.

The chemistry of these two is so strong. It was a very good book. The tension as she tries to fight the feelings she had years before that keep creeping up on her.

But he burned her once and she is not going to let him burn her again. Very enjoyable book.

### **Angie says**

This was a great shorter story! I loved how these two had a history and how they finally talked about the past. These two had such a chemistry. I couldn't put this down! Another great one from Noelle!

## **RedRedtheycallmeRed says**

I've read books from this author before, but they were all better than this one. Honestly, I was bored.

Philip seems like he has a stick up his ass for almost the entire book, and Lucy is holding a (14 year old!!!!) grudge against him for something so stupid. These people are 37 and 31 years old and yet they were acting like immature teens half the time.

The archeology/ghost hunting stuff had potential to be interesting, but it was a very minor subplot.
