God Is My CEO: Following God's Principles in a Bottom-Line World Larry Julian

Business leaders face the difficult task of reconciling their personal beliefs with the bottom-line demands of their business obligations. Often, it seems like the conflict between short-term business strategies and their desire to "do the right thing" pull them in opposite directions.

In *God Is My CEO*, readers will learn how to:

Develop their God-given talents and skills, while developing a spiritual center

Gain ideas and encouragement through real-life stories of successful business leaders who have faced the same challenges

Learn to apply a practical daily plan to overcome the toughest business issues

Focus their energies and thoughts on moving forward with a sense of purpose

Many business leaders struggle with the dilemma of being successful and living a life with purpose. *God Is My CEO* offers a practical and inspirational source of guidance for achieving a balanced and accomplished life.

From Reader Review God Is My CEO: Following God's Principles in a Bottom-Line World for online ebook

Jean Maurice M. Prosper says

As a Christian CEO, we are to show that God is our own CEO and that he is the one who is running our business. Do we really want to show the world that we serve a real and mighty God? This is the way forward, recommended for every CEOs and every business owners..

Jorshun says

Is a good book, which use religious views to explain the solution of each CEO problem.

Edgar says

A must read for anyone who's interested in doing business God's way

Atchisson says

Nice primer for Christian-based leadership skills.

Matt Clem says

A great book to serve as a reminder to seek out a life of significance, beyond just status or monetary gain.

Charles says

WOW!!! What a read. It was quite inspiring to note that I can apply the principles of my faith to help me improve the bottom line in my business

Laureen Peltier says

As a manager with almost 20 years experience, I have often struggled between my spiritual practices and my corporate role as manager. Julian demonstrates how okay it is to blend the two. He shares stories of CEO's and NFL coaches who were uncompromising in their beliefs and still were hugely successful. At the end of the book, he has a personal business plan and well-thought out questions to help any individual balance

spiritually (or your beliefs) with corporate responsibility to the bottom line.

Be advised, that this book does quote scripture as a means of conveying the message. Julian appears to look at individuals as potential disciples of God, and therefore, you should read if you hold strong beliefs about scripture.

Eric Beaty says

Just finished this book—all but the appendix on your business plan; saving that for the beginning of next year—and it was a decent read with plenty of examples and encouragement on how to allow the Almighty to lead you in your search for success. Perhaps the most important thing I took away from this book is the concept of how to look at business in a whole new way (Significance instead of Success, Addressing the Important things rather than the Urgent things, etc.). I've got a bad habit of "literary multi-tasking" in that I'm constantly finding new books that interest me so I end up reading about 5 books at a time, so for that reason it made it hard to finish this book in the time I easily could have. Still, a month and a half isn't that bad.

This is the kind of book I mark up with little "stars" next to each point I find worth remembering. That way, it helps me skim over and glean the important points of each chapter when I re-read the book without having to read the whole thing again. I recommend reading these types of books with a pencil in hand for this very purpose.

I purchased the new anniversary edition complete with extra advice from 20 leaders. These tips were sort of random and several didn't really have a main topic and were only one page long, which was sort of disappointing. Hopefully I'll get more from it when I read it again in the future, especially since the main points have my little stars by them now.

There are a few great chapters in the book I recommend reading as a sample as you're perusing it in the bookstore. Chapter 6: "Yielding Control" and Chapter 9: "Priorities" are the two best chapters in the book in my opinion. I really got a lot of great points out of these two chapters that I feel will give me most of what I need even if I didn't read another chapter in the book.

Note: There's a section of the book that's not listed in the Table of Contents that's definitely worth checking out as a final synopsis of the contents of the book on page 254 just after the Chapter 11: "Timeless Tips from Twenty Leaders" entitled "Observations from the Cutting Room Floor."

michael says

my dad thought I should read this book, so I did. Its an interesting collection of little success stories where managers held to their religious convictions instead of folding under business pressures.

John Laramore says

Great read! As a business owner in today's world, it is essential to understand that it is a benefit to operate in integrity and above all, believe that God wants you succeed in business no matter how bleak it may appear to

be.

Ormond Williams says

Excellent read especially for business people!

Josiah says

A book that I plan to use as a reference as there is so much to glean. Profit and People, not Profit or People. Faith and Business not Faith or Business

Dino Price says

a decent tool for everyday life and management. I liked it - some parts were a bit dry. Maybe that's the nature of user manuals.

Jean Maurice M. Prosper says

God is my Ceo

This is by far the best business book i have read to date. It is a MUST read alongside the bible with all serious business people out there. The book is a real encouragement to us believers in walking our faith in the business world.. Its a book I a. Willing to read again and again in the future...

Joel says

God can help anybody. In this book you will find some very smart people who had God wisdom to become more successful, and use principles to help there company be the best.
