## **The Inside** Isaac Marion

A novel I wrote when I was very young, which will probably never be published, but since people have poured some heart into discussing it here, I'll leave it up.

this book haunted me. i'd take it on trips, but i never really dove into it. i've always been amazed at the cover art. well now, that i've lost my vita, shattered my ipad, and have another book entirely to read if i'm to make my book club (that i've never attended), i started it. it's always about a girl, but that's fine with me. i can get on board, take my ticket, and look, i've even secured the safety belt \*unhooks it when noone is looking\*. so once i started, i found my sleep cycles changing. the book would always be within reach, for a few pages read, and then to ration it off, i'd put it away and let my dreams make their own connections. i staved the end for as long as was reasonable, but was still a little upside down after it was all said and done. if only i could jump in a car, drive to another Inside'r to talk to about it. that would be bliss.

This is one of the best books I've ever read, one of the best. Besides, Isaac is a friend.

This book was really interesting, full of a lot of inventive concepts and I enjoyed reading it a lot. It really kept me guessing the whole way through until the really great ending. At times it was confusing and I felt like I had missed something but with careful reading and staying with it until the end everything comes together pretty well.
