Hunting Mia Jordan Phoebe Green

Mia Jordan had spent four years running from the man who terrorized her family and threatened to hunt her down and kill her. But it seems as if she has finally evaded him. So when sexy, charismatic Zade Shaw walks into her life and sweeps her off her feet, Mia gives her body and heart to him completely.

Their love is fiery and passionate, making Mia feel like she can finally love and trust again. But Zade isn't who he seems, and his life is tied to Mia's past in more ways than either of them can comprehend.

When dangerous and powerful Marco enters the picture, hunting for a mysterious USB drive, Zade and Mia are both forced to confront their shaded pasts.

No one is who they claim to be, and everything Zade and Mia thought they knew will be tested, including their love for each other.

Kerry Richardson says

This was a free download so I wasn't expecting much of it but boy was I wrong, it turned out to be really good. Well written with strong characters and I was gripped from the beginning, reading it in one go until I finished it at 1.15am. I've now downloaded the next instalments and once I've had some sleep I'll be getting straight into the second book.

Leisa Prater says

I am excited about this story.....I can't wait to see what happens to Mia and Zade!!!

Melody says

nice!

Brittany says

Way a way to be pulled into a story and invested in the characters.
