## UFOs Above PA Gerard J. Medvec , Mark Sarro

Alien abductions, wild silent spacecrafts and magical ET technology all come together through eyewitness accounts in UFOs Above PA! Read never-before-told sagas of sightings that are similar to others around the world. Told in short-story style, feel the wonder, terror and revelation of folks seeing objects and beings from other realities. Return to the '60s when a UFO visited a prominent eastern PA university. Witness a young boy being chased by an alien craft through the streets of his western PA suburb. Feel a woman's terror as alien lights blast through her vacation cabin in central PA. Discover the real, nightly alien invasion that nobody talks about and nobody can stop!

UFOs Above PA: Much like the “Mid-Atlantic UFO” book I read from this author, I would definitely recommend this book to anyone who has a supernatural based library, interest in UFOS, etc.

This book, like the previous two, are a wonderful compilation of UFO stories from the PA locale. It is written in an easy to read, and fun, format. I enjoyed this book a bit more than the Mid-Atlantic stories because of the lay out within the book, the photos and maps to accompany the stories, and the overall flow of all the personal encounters.

One of the things I am most scared of in this life is aliens. This book was fantastic to feed that creepy intrigue I carry within. Some of my favorite stories within the book:

Most Hallowed Ground

Drones

Alien Base Camp

We get the photos (not of anything even vaguely extraterrestrial but the locations they reportedly took place in) and longer stories, covering a few pages each, adding atmospheric descriptions of feelings and personal background. The authors take us by the hand and bring us into their world of believers, rather than leaving us at the door to decide whether or not to enter. I would have liked more precise detail about when and where the different incidents took place though. In this book, the authors clearly state that they present nothing but the true UFO stories that they believe in, anything that seems like a hoax is filtered out. They do have an interesting point too - as they say, UFO's, as the term is properly intended, DEFINITELY do exist, there is absolutely no doubt that certain flying objects remain unidentified, but that doesn't necessarily mean that they are in the slightest other-worldly or extra-terrestrial.
