**Mauri says**

Epidemiology textbook, Spring 2015.

**Graceanne Wayser says**

Just about the most boring book of all time. Dear god, make it go away. Couldn't the authors at least tried to make this interesting? Sincerely, a frustrated graduate student.

**Dana says**

This is a terrible textbook. Dry, unnecessarily wordy, limited real-world examples provided for difficult concepts. I spent a lot time re-reading sentences three or four times trying to figure out what the heck the authors were saying. Also—huge pet peeve— in referencing a table or figure, the text forces the reader to flip back and forth between the reference and description on one page and the table on the next.
