A Small Boy's Cry Rosie Lewis

A heartbreakin and shocking short story from foster carer Rosie Lewis.

Toddler Charlie falls from the second floor window of his tower block home while his mother is busy shooting up in their dirty council flat.

Laying alone on a pile of rubbish until concerned neighbours hear him whimpering, Charlie is taken to hospital by police officers who are unable to rouse his mother.

With a gash to his head, a terrified Charlie is delivered to foster carer Rosie Lewis's home. As Charlie opens up about his past, a picture of the traumatic life the little boy has endured so far becomes clear.

I don't quite understand why the story is so brief, unless it's part of a series about all the children fostered by Rosie. it's a lovely but sad memoir

Beautiful child

A sad story . a beautiful child who attaches himself to the foster carer loving the closeness and cuddles he receives. Which is something he probably had never experienced before. The actual story how it is laid out is very easy to read and get into . didn't want to put it down.

Danielle says

Beautifully written, it follows the story of Charlie who comes to Rosie in a terrible state after a harrowing accident. Tender and sweet, the story reaches a climax when Rosie takes Charlie for a family outing and, through a chance meeting, discovers the secret behind his misery.

I loved Helpless, the story of baby Sarah, and wasn't sure her next short story could be as good, but A Small Boy's Cry is full of emotion and brought a tear to my eye.

Well done Rosie, keep them coming.

Hayley says

to short didnt get into the character development like I did with cathy glass novels and other books of this sort.
