Little Liar Caryn Y. Umetsu

Four-year-old Bobby has recently become Mitch's big brother. No one seems to be giving him the attention he thinks he deserves. Is he becoming extinct like his favorite dinosaurs? Everyone suddenly seems extremely busy. Papa works all day and when he comes home, he becomes a grunting zombie in front of the TV. Mama who always had time for him is now busy as a bee with baby Mitch who poops and fusses all day like an annoying parrot. Bobby decides that instead of becoming a big blob of jealousy, he will take the situation into his own hands and supersedes everything! Every little thing that comes out of Bobby's mouth is now bigger and better. Little Liar is a modern day Pinocchio story based on a real boy; Bobby's nose doesn't get any longer but his lies just keep on growing and growing!

Zhu says

Full disclosure, I won this book with Goodreads.

I found it cute and easy to tell to a four-year-old. He seemed to understand the story and it was easy enough to adapt a few bits that could resonate with him more. I also love the easy-to-read print, perfect for a kid who is constantly trying to "read" (i.e. spelling letters).

It's a good book, the story flows well and is nicely illustrated and it's perfect for kids with a lot of imagination.

Anne says

I won this book with Goodreads. I was disappointed when it arrived through the post as it had only been packed in an envelope and was badly bent. However, I placed it under a pile of books and it soon became readable.

I had hoped to win this to give to my granddaughter aged 7 but having read it I am not too sure if she is a little old for it as a gift but I will read it with her at some point. I feel that it is probably more suited to a 2-5 year old but it will certainly raise some points for discussion.
