Ariana Leotokos has been a virtual prisoner of her father for the whole of her life. She is young and beautiful, and was first educated in a convent and then imprisoned on her father's private island. She is isolated but strong, intelligent, and determined to get out.

Theo Atrikes is a successful business man with a mission. He is handsome, intelligent, and utterly ruthless. Nothing will be allowed to get in the way of his goals.

Miles Leotokos has issued a challenge to all and sundry. They must disable his powerful Minotaur Virus to win. If they win, they get a job and a fortune. If they lose, they will be destroyed personally and professionally. Theo is very different from the computer geeks who have tried before and Ariana is hoping he will be willing to help her escape in exchange for the key to the puzzle.

This is an interesting retelling of the Theseus and the Minotaur story without the tragic ending. Theo is a strong and attractive character who adds an interesting twist to Ariana's proposal. Ariana is strong and determined not to marry her father's right hand man and continue her cloistered life on the island. Two such strong people make for sizzling chemistry and a gripping love story. Ms. Hewitt never fails to give the reader a great story with memorable characters.

loved the book though it could have been longer and so much more could have happened

Modesty_b says

the story's good but not much in the way of emotional depth and it's short.it would have been better if it had some more to the story(like her father's reaction).

The Greek legends are still read and studied today because of their timeless themes of love and passion. Kate Hewitt had adapted this one and given it a modern setting to the story of Theseus and Ariadne and the result is really quite delightful.

This is, in the present time, Theo and Ariana's story. Ariana is the over-protected daughter of Miles Leotokos, a powerful and wealthy man. Leotokos has the rather sick hobby of challenging young computer experts to solve the riddle of the Minotaur, a computer virus. If they succeed, they get employment in Leotokos' company. If they fail, Leotokos has the clout to ensure that they never get a decent job again. He has apparently ruined six promising careers so far.?

Theo Atrikes isn't too worried about his future though. He has his own company and claims to be trying to solve the puzzle because he likes a challenge. However, he gets a challenge from an unexpected source. Ariana wants Theo to help her to escape from her father's clutches and the arranged marriage he has in mind for her. She's ready to give him the information to help him solve the puzzle in exchange for her freedom. Theo isn't really keen to take what Ariana is offering, but helping the young lady to escape? Well that's a different matter entirely.

This is a gentle but rather exciting romance which takes place in the magical Greek archipelago. You'll practically see and feel the Aegean sea and the atmosphere of the Greek islands. Ariana, although sheltered, has a keen intelligence and a will to make it on her own, not just to be rescued and taken care of by another 'master'. Theo too has to face the challenge of making up his mind whether he really has feelings for Ariana or whether the attraction is in taking her from her father - the man he hates most in the world.
