## **Witchfire Lauren Maddison**

No one knows what the grave robbers were looking for when they violated the grave of Connor Hawthorne's recently deceased grandmother, Gwendolyn. Whatever it was, they didn't find it, but they died trying. Two corpses and a casket full of stones are all that Connor has to go on as she leaves her home in Santa Fe, N.M. for Glastonbury, England, with Laura Nez, the courageous Navajo guide who saved her life in the high desert of New Mexico. Once again Lauren Maddison blends thriller fiction with mythology and lets it build to a heart-pounding conclusion.

Lauren Maddison is the author of the best-selling, "Deceptions." A former resident of just about everywhere, she now makes her home in Southern California.

## From Reader Review Witchfire for online ebook

### **Erika Nerdypants says**

I do not like this book. I picked it up used, the synopsis sounded interesting and I am a fan of lesbian mysteries. Then, as I got started, I remembered reading the first novel in this series years ago, and not being able to appreciate it at all. Far too much mysticism for me to be able to stand as a solid mystery. I'm not knocking it for anyone else, it's mostly a matter of it not being believable for me, and I just couldn't really see myself struggle through another Connor Hawthorne book. Disappointing though that I couldn't remember this before I bought it. Oh well.

### **M.E. Logan says**

the book impressed me. I had not read any of Lauren Maddison's book and had picked this one up because of the Mists of Avalon references. I found it balanced, between the present and the past. I enjoyed the plot development. There were enough references to how Connor Hawthorne and Laura Nez met that I must go find the previous book, Deceptions. I will probably look up her other books. They will be a good addition to my library.

### **Heather Henkel says**

#### **Incredible**

This was a really amazing book. The way history seemed to blend with the characters lives was really well done. I found all the complex themes intermingled surprising well and didn't get too hard to follow. I really like this series.

---

### **L.v. Maddison says**

Book Two in the series -- set primarily in England. I wrote much of this story while staying in Glastonbury, very near to some of the scenes in this book.

---

### **Windy says**

I bought this from a charity shop without realising it was the second of a series. Normally this wouldn't be a problem but this author kept harking back to events in the first book which I found frustrating since I hadn't read it. Also the American author seemed to have done a lot of research on England and English life which she wanted to keep including in the story but a lot of her information was inaccurate and frankly annoying. I gave up after 2 days.
