## **Storm Warning** Linda Sue Park

Throughout the hunt for the 39 Clues, Amy and Dan have encountered some of the darkest aspects of history . . . and had to deal with the role their family played. But are they ready for the truth? In this thrilling ninth installment, Amy and Dan hit the high seas as they follow the trail of some infamous ancestors to track down a long lost treasure. However, the real prize isn't hidden in a chest. It's the discovery of the Madrigals' most dangerous secret and, even more shockingly, the true identity of the mysterious man in black.

The Book 39 clues is an amazing book! It is an immature reading for me but I love it! The whole story line keeps you incredibly captured.

The story is about a pair of brother and sister (The Cahills) who after their grandmother died left their whole family a scavenger hunt for the 39 clues. There are four branches to the family and Dan and Amy are trying to figure which they belong to. While on the hunt they discover fascinating things about their family history and themselves. Who will win the hunt?

I would recommend this to any boy or girl of any age who enjoys action filled mystery books. I honestly think many teenagers would enjoy this too. I guarantee you won't be disappointed.

A vast improvement over the last two installments in the 39 Clues series, "Storm Warning" finally reveals the mystery behind both the Madrigals and what Nellie Gomez has been up to since the clue hunt began.

This time, Dan and Amy Cahill are off to the Caribbean, searching for clues about the pirate Anne Bonny and other historical figures of the area. "Storm Warning" has a good pace and none of the clue hunting seems to be rushed as it was in the two previous books in the series. I loved learning more about Nellie, as well as seeing Natalie Kabra getting some more page time as well.

I'm still a little worried how they're going to wrap everything up in one more book, but the ending to "Storm Warning" explains all of that pretty clearly. All-in-all, a great book to rev up excitement for the last book in the series!

I'm going to give a generic review of the series. Basically because I'm lazy and don't want to write 39 reviews. Okay, 11.

We finally read Book 1. And then because we liked it so well, the entire series. One son (age 12) has read them all, the second son (also age 12) is on Book 2. And son #3 (age 8) will be starting as soon as he finishes his current book.

I thought the premise of this book very interesting. I loved how they integrated history and geography along with problem-solving skills and code cracking. Add in the action, humor and intrigue and kids (and some adults) can't put them down. All three of us that have read 39 Clues thought Book 2 the weakest of the series. But as one son said, after finishing the series, "Gordon Korman seems to be getting better. I think he's a decent author now."

Some of the books are better at teaching the history part, others just barely skim the surface and you don't really learn about the person they're 'highlighting'. I appreciate that they're clean books - no curse words or you-know-what going on. There is some violence (very little, if any, blood) and several murder attempts, but they never work.

The series would most likely be called twaddle by my Charlotte Mason friends. I do, however, think it has more redeeming qualities than most kids literature and I'm happy to see my boys devouring a book every day or so.

I think that this book is the best book in the series and that the whole series is really coming together and I am starting to understand and learn more things that I did not understand in the beginning of the series.

so this isn't really a four star book in comparison to what i usually consider four star books. but compared to the other books in this series - which i can't stop reading despite some seriously sub-par offerings - it is. by which i mean it's probably the best book in the series. not in small part because stuff actually happens and you start getting answers to the questions that have existed since the series began. and there weren't so many ridiculous situations and the characterizations didn't suck. so, yay.

4.5 stars. One of the best books in this series yet! Things are finally coming together and being revealed as Dan and Amy race around the world - this time in the Caribbean - against relatives on the hunt for the 39 clues. The narration's viewpoint shifted between a few of the characters, so we got to see how others were feeling, and there was excitement mixed with danger and red herrings. The author was one of the better writers, too, which made the reading super quick and smooth. The reveal at the end was clever and made sense of much of the plot of the series so far, so I'm eager to see how the next book ties it all up!

### **Lady Flo says**

It seems that books are turning to be easy to fathom. No more complicated trips, journeys, messages or notes. So far I guess it was the most interesting and important book in the series; Revealing secrets of Nellie Gomez, the man in black ( now in gray whose name is Fiske Cahill ), and Madrigals. For centuries Cahills

thought the family consisted of four branches: Ekat, Lucian, Janus and Tomas. Noone knew about Madrigals and yet was afraid of them. In fact, they descended from Gileon and Olivia's fifth child, Madeleine Cahill, who was born after the fire in the laboratory and noone was aware of her. Book had such a happy ending, except the death of Lester.

I gave this book 3 stars because this book is filled with mystery. You never know what is going to happen next. In this book right now they are going to decide whether to go to the bahamas or Jamaca. Nellie is one of the main character she wants to go to the bahamas because she thinks there are a lot of pirates there. She also wants to find some treasure. Mr. McIntyle is not convinced he wants to go to jamaca and lay and the beach and mostly tan. Mr. McIntyle is Nellie's driver he takes her to places where she wants to go and that is all he does basically. But the 39 clues books are good books and I am going to keep reading more and more of these books and I suggest that you read some too.

Dan and Amy want to find the next clue to their clue hunt, but some people are getting in the way of things like the man in the black suit, Natalie and Ian, and possibly Nellie too. So, Dan and Amy try to keep their secrets (clues) to themselves, and with help from Nellie, Dan and Amy get to the places they needed to go like the Caribbean. Then Dan and Amy find a clue that changes their whole life, the clue that tells what branch of the family tree they are in, but in order to open it they need smaller puzzle pieces to fit the big puzzle. This story is about trust and loyalty. This was one of my favorite books to read the series, it had me gripping my sheets when I stayed up to read it in bed, and I am sure you will have the same reaction too.

### **Cathy says**

The book showcases lots of satisfying reveals as we near the end of the journey. But somehow not so much heart or excitement. It's not that there weren't emotional scenes, adventure betrayals, love, sacrifice, danger, etc., but it felt a little distanced and simplified compared to some of the books. There was an enjoyable amount of girl power in the book though, both from historic figures and our heroes.

I'm just hoping that the last book isn't too much of a perfect ending. The series has shown an admirable willingness to show many sad results from greedy and selfish behaviors. I hope it doesn't get swept under the rug to enable an unrealistic happy ending.

### **Kristin says**

This was one of the better books in this series...maybe I'll read more by Linda Sue Park. But anyway, this book explains many things that I had questions about before. Without giving too much away, I can't say much more. However, I'm starting to have serious doubts on whether they will be able to put a solid, worthy ending on this series in just one more book. There is just so much going on...and I'm hoping that Book 10 is a

good, final piece like with Harry Potter. If it's anti-climatic, I'm going to be highly disappointed.

Glad I persevered this far. The identity of The Man In Black\* is revealed. At great cost, Dan and Amy and their au pair Nellie learn the secrets of the Madrigal opposition to the Cahill family.

\* no actual relation to The Princess Bride.

### **Devanshi Gupta says**

This was the best 39 clues book I have ever read and that is saying something.

That's why it deserves the 5 stars I gave it, though I really mean to give it 4.5 stars.

I did not expect this book to be so good, I did not expect to get so engrossed in it ,or feel so much excitement over it. I did not think a 39 clues book would make me feel this way. But with this book I think Linda Sue really pulled it off.

When I pick up a 39 clues book I do so for a light reading and to have mindless fun. But oh boy this book offered me much more than an average 39 clues book.

Spoilers

We finally get to know about the whole Madrigal business and it has started to make sense! Also don't me started on Lester. It was so unexpected! Till the last second I was expecting some doctor to come over and say that he is not dead. These things are not expected from 39 clues! He was an innocent person and quite calm in the face of danger and his death just made me so sad... I couldn't believe it. I do not pick up a 39 clues book expecting to get sad over unexpected innocent deaths! But oh boy!
