Her private fantasy turns monstrously real when the demented alien claims she's his mate and takes her to his spaceship.

Kord, a Tauran warrior, is part of a landing party sent to spy on Krellian slave traders. When a human female runs into him, literally, his body instantly recognizes that she's his mate. **LOVE ME SOME KORD!**

This was such a good story. It was a great set up for a series. Can't wait for more books!

Okay story but didn't have a lot of chemistry.

Fantasy Warrior by Jaylee Davis is the first in the Alien Love series. I have mixed feelings on this book. There are places where it is very good and well done, and places where I was like no, just no this cannot be happening.

Pamela is the daughter of a well to do politician. She is going to a fair in the Keys in disguise. There she gets the adventure of a life time. I liked she is a defiant, she is willful. But once she gets captured by Kord that spirit seems to change to just sultry and compliant.

Kord big macho warrior. He is on Earth to stop slavers. He finds his unexpected love there, Pam. Well Pam lies to him about her name at first. He can smell lies. He kidnaps her to save her from the slavers. Oh did I mention the first time they have sex is dubious consent? Yeah it is really dubious. I just did not like Pam turning her personality all the way around once she gets with Kord. It was like she was possessed by someone else.

Lots in this book are expected scenes. Which took away from the over all enjoyment I would have had.

There is a story here, it is okay, not the best but hey it is pretty good. Just over look a few things and you will love this one.

**Ummmm**

The description sounded so good for this book and the sample was great..... then it was liking pulling teeth

to finish it. There was no growth of the characters and the H/h relationship was nonexistent. Biggest waste of \$5.

This was a great story and the book was well written. I'm going to read some more of Ms Davis' books. I'm looking forward to the next book in this series.

#### **Awesome Paranormal Romance**

I really enjoyed this book and loved the chemistry of the characters. Once you start reading, you will not be able to put it down because you want to see how it ends. Truly enjoyable ,well written, and this is a must buy. Keep them coming and so ready to read book two.

#### **great book!**

I've really enjoyed books that I've previously read by author Jaylee Davis and this book was no exception. I just fell in love with Kord and Pam's story. The book was very well written with a great plot. Alien slavers come to Earth and another group of aliens trying to thwart the kidnapping of women from Earth. One of the good warriors runs into one of the Earth women and quickly realizes she's his mate. What follows is their whirlwind courtship and then attempt to stay together. I look forward to the next book in this series!

I'm really into the Sci-Fi genre right now so I found this book on Amazon while searching for good reads.

I didn't completely disliked this book. I did like it but felt like the story could have been more. It was a short read.

Kord has the alpha male and "Mine" mentally right. I like him very much he is...memorable. I also liked Pam she was feisty and likable. She was not so memorable. I felt like she is similar to other female leads I've read before. She didn't have one thing that made her stand out.

I found myself having to re-read a couple of paragraphs because there was too much description and some of the story (specially Kord's ancestor's history) confused me a bit. I still didn't let this keep me from enjoying the book and completed it in one day.

*Ok...Hello!*

*Finished this short read yesterday and I found myself eyerolling.*

*But this needs to be reviewed!!!*

*So... Summary*

*This is a fantasy romance with an alien warrior. Our girl, named Pam, goes to a party in disguise. And it just so happens... she bumps into tall muscular alien warrior called Kord and his friends, who are here to save people from evil extraterrestrial slavers called Krell.*

**Kord a Tauran Alien Warrior. Is something like this, without the sword... Copper eyes everyone!**

*Why do they help humans? Becuase they want to tighten the strings with Earth politically and benefit from it of course! Being that said...While Kord is trying to do his job as a space warrior, he can't ignore Pam. Destined mate...You know the drill. Anyways, he saves her and takes her away to his ship. If you want to know the rest... Well, read my friends!READ!*

***So points to take in account!***

***Thank you my darling Loki!***

*So...*

*-Short mildly entertaining read.*

*-Destined mates.*

*-Sweet and caring Alpha male.*

*-Don't expect deep world building. Little, intriguing to non-existent.*

*-Do not expect deep character building.*

*-Average sex scenes.*

*-Good alien characteristics and culture. Potential in type of alien but since they seem very human, their is no uniqueness. Just a different culture.*

*-Fluid, easy to read writing. This writer reminds me of Laurann Dohner.Their styles are very similar. Jaylee Davis has this spark in her writing that is not fully appreciated in such a small regular book.*

*-No real plot. Just simple meant to be love story.*

*-Her characters are very likeable and our main heroine is strong yet sweet kind of gal. At some points she seems very relatable but has these many sue advantages that I kind of don't sympathize with. It just so happens she's the daughter of an important political figure who solves everything. Too easy...*

*-I liked the relationship build up. Although there wasn't much space for a long get to know each other.It was regular. Most shorts books just skip real quick to the hot and sexy. But Jaylee made a little space for the main characters to get to know one another. I liked that detail.*

*-Cover is beautiful! Loved it!*

*All in all, there are many interesting details and writing ingredients that are worth to acknowledge and review. Jaylee Davis definitely has the potential to make something bigger. This book was entertaining and regular, so I'm giving it a 3.0 stars. Already read second alien book and posting review on it as well.*

**Recommendable. I bid you farewell, and may your next reads be fab! Mua!**

**Sarah says**

Meh... it was ok. I was into it at the beginning but then it just tapered off for me. There was no 'Aha!' moment when I felt like the two really connected, so I'm going with 2 stars.

Quite enjoyed this story. Strong alpha male, somewhat strong female.  
Set in the future. A mating imperative type story. You know the ones, lust/love at first sniff.  
Pheromone induced numbing desire.
