This book is indeed a page-turner, though the flow of the story are quite cliches already. It incredibly projects the right emotions - the passion - the characters have in every chapter. Lucas is best portrayed as an old soul and perfectly pictures a vampire in love. The same with Elsa, that is a best picture of innocence at the same time a combination of shy but courageous personality. However, I think it has an unsatisfying ending but good enough for the readers.

I really enjoyed this story.

Lucas Edwards is a billionaire playboy type- to the tabloids anyways. In reality he is a 700 year old Vampire and in a way he is a prince and next in line for the "throne". When his father chooses to get some eternal rest then Lucas will be in control of the Association.

Elsa Collins is at college on scholarships. She is determined to be a Dr to show her mother she can become something more, even though her mother is dead. Elsa has a vain room mate, Linda, who is the spoiled child of a Senator. And another friend Tanya.

Linda is jealous of Elsa for her beauty but Elsa is pure of heart and don't see her own self worth.

When Lucas sees that Elsa is meant to be with him then all is disturbed within the human and vampire world during their "courtship".

Lucas has a protector who has been with him through the centuries as well, Jason who is a werewolf.

Great story. Not overly blatant sexuality.

I give it a 5 star rating and look forward to reading more from this Author.

It is nice, but after reading so many novels of Lietha Wards, I must say 'innocence' is what she has been using abundantly in the plot, kindly merge it with other traits like perky or chirpy etc, to bring about a new character; Thanks

ome may have already read this book, as its been on the internet for a wee while, but I haven't. so I am reading now.

Ive read every other book of Lietha wards books and I have to say I love them. She may not be a published author or a well know writer, but her stories are captivating. Every story in unique and transpiring. So I thought I would give this one ago, I wasn't sure I would like this one, due to the fact that I have read so many vampire books it starts to lose the sex appeal. Im more interested in the wolves for some reason of late, but im giving this book ago. I have to say its not too bad so far, but its not as good as her previous books.

So far, the story seems to be about a vampire who lives in a race that doesn't usually mingle with human, but Lucas seems to be a rare one. He like to live in the world with humans by his side, he like to be in their company more than his own race.

Lucas is a powerful vampire and he has the ability to control power and read peoples mind, hes also destine to be the new king. Due to him becoming the new king, he had mixed feeling about it, and the others of his race are jealous and try and take his power by killing him. Therefore Lucas has to be well protected, which he is by werewolves.

Something new is happening to lucas, hes found this woman that for some reason has pure power over him. Shes a human mortal, pure innocence and her beauty captivites him. He cant seem to get enough.

Elsa is a student at the local university. Shes the type of person how keeps to herself and doesn't rarely go out. Well shes never been out before, not until her friends make her go out and that is the first time she meets Lucas. Shes in a haze when she meets him, she cant seem to forget him. She wants to know him more, but she has other things to concentrate on. Shes on a scholarship, due to the fact that she has no funding or any family. Shes on her own, and has to stick to the programme otherwise she could lose everything. She trying to qualify as a doctor.

The more I read this book, the more im starting to feel slightly weird. I don't know what it's about this book, maybe its because im not sure where this book is leading, but I feel very but oof, but at the same time fascinated in what might happen.

---

I cant seem to see whos the good guy and whos the bad. Its not confusing, but then it is. Its just weird.

Elsa and Lucas are starting to get to know one another. Lucas has is priorities, and hes a vampire. Lucas second in command, his protector seems to be slightly weird. Im getting the sense even though hes willing to protect Lucas with his life, he like to inflict pain to women. Slightly weird. Maybe this book should be called weird something or other!

Still the more I read the more it gets slightly confusing. Maybe I just don't get it. Really I don't see why Lucas just doesn't ask if she would change for him, hes got nothing to lose. He could just pretty much erase it from her mind if he get a result he doesn't like.

Elsa seems to be gaining more confidence the more shes with Lucas. Whatever this power she holds, its becoming strong, more people seem to noticing her. Seeing her beauty.

I may sound like a complete critic, which is a suprise to me alone due to the fact that i usually find Lietha wards book very entertaining and very good stories, but this one for some reason seems to be a little weird. I know i have said that a lot lately about this book, being wierd. But to me it is. I cant seem to, well understand it.

Its great to have this sort of imagination, its a talent no one else can have. I give her credit for being able to write a story, because i surely cant.

Its just, this Lucas character seems to be a little controlling and i dont know. He sounds very sexy and all but his motivations and all seem a little off.

Then heres Elsa who has this pure innocence about her, but throough out the story there seem to be moments where im like, no one would call that innocent and cute. To me she seems to have an odd side. one moment she will be like hey girl hows it going, then complete oppisite, god i cant believe you just did that how could you. Seems a wee bit weird.

Theres also her friends, which are just way way way strange. Especially her friend called Tanya, what is her story. I dont get you love. I really dont

I have finished this book and i have to say the ending is good like any other. I didnt really feel any connection towards this book, and i doubt i will remember it.

It was a good story and well written. I like it whn books are this well detailed, and very imaginative. It takes pure talent to be able to even right a book, but one that is imaginative.

I did like the book, but im not going to change my mind from what i said earlier, its still weird !

Actual rating 2.5 stars

Reading this was like watching a B movie, from the characters, the dialogue and the storyline it was all very mediocre. There were lots of typos and grammar error too.

The protagonist Elsa just cruised along during the entire book, she doesn't have a back bone and just let everyone push her over. People keep on repeating how beautiful she was and how clueless she is about it, it get tedious.

I liked Lucas, I felt that his character was the best in the book. He had potential to be a great lead but the supporting characters just pulled him down. IMHO

I gave it a two.five star rating since I managed to finish the entire book and I really like the epilogue, so there you go :)

i think the book is pretty good but all are imaginary .. their are not a single being in the world known as vampire they all are only found in books and movies, but the book is pretty good.. nice work!

I normally enjoy vampire stories. However, It was hard for me to relate or like any of the characters. Lucas is manipulative and controlling throughout the whole "relationship" and Elsa is this naive, virgin with no self-esteem. Elsa is no heroine, just a romantically inexperienced fool easily bought by a rich man with a great smile. It took great efforts for me to finish this book. I guess I'm getting tired of reading books featuring experienced men being enthralled by the "pure, virgin" barely legal girl to the point of being possessive and controlling, while the girl being so pathetic that she thinks it is romantic.

I must admit I have a weakness for Leitha Wards I love her books, some more than others but I've read them all and there isn't one I didn't like at all. This is one of my favourites it's about Lucas a vampire who's father Valear is the most powerful of them all. Lucas has become jaded with his life until he comes across Elsa a young innocent college student who has no idea how georgous she is. Lucas is drawn to her and she becomes infatuated with him. This is a love story with vampires, werewolves thrown in along with some great characters and humour. This book is not without it's faults like all of Leitha's books the grammar and punctuation leave a lot to be desired but I've given it 5 stars for sheer enjoyment.
