### **Monolus says**

OK, so to be fair Author is not promising to teach anything about survival in his book, he says he is going to just share his experience. For me, the first 2 Parts were about giving an idea about a specific topic and a constant reference to the extreme violence without explanation. Then finally in the 3rd Part came samples of violence, not too graphic content material for me (I've read worse in some war and conflict reports). Before reaching Part 3 I was kinda disappointed, although I collected a bunch of good advices from here and there. But when I hit Part 3 I got a better visualization because why author was so shocked by that violence, I would have been shocked worse if I was him.

The only reason I don't give 5 star is because it didn't really make me understand the situations the way for example WWII memories and books do. But overall, I think I'm pretty glad that I read this book. I might even take the online course at some point, because well, I like to learn more.
