**THE SECRET MUST BE KEPT...**

For three thousand years, the Herculean Society has preserved the legacy of the ancient hero, Hercules, protecting history's fragile relics from humanity, and humanity from the dangerous truths behind the legends. Now, the Society's new leader, archaeologist George Pierce, faces his first test: the Cerberus Group. The shadowy organization has two goals: the collection and distribution of black market relics, tech and secrets, and the purge of those deemed unfit for survival.

Pierce and his niece, Fiona—the last guardian of the ‘mother tongue,’ the forgotten language of creation—discover a secret entrance to the legendary Labyrinth, and at its heart, a hidden trove of relics that point the way to Hercules’s greatest discovery: a mutagen that can rewrite the very code of life. When a surprise attack leaves Pierce and Fiona trapped in the deadly maze, fighting for their lives, the race to stop the Cerberus Group begins.

To defeat this new enemy, Pierce must assemble a team of experts including Felice Carter, a geneticist with a dangerous secret, Augustina Gallo, a mythology professor, Cintia Dourado, a high tech hacker, and Lazarus, a dead soldier returned to life.

Guided by their knowledge of science, history and mythology, Pierce’s team sets out on an epic journey, following in the footsteps of Hercules, to stop Cerberus from controlling the power that rises from the Well of Monsters.

## **...OR THE WORLD WILL BE CLEANSED.**

Jeremy Robinson and Sean Ellis, the international bestselling team behind the Jack Sigler thrillers, including *Savage* and *Cannibal*, return with new series that rewrites the way we see history. Rivaling the best of Matthew Reilly and James Rollins, *Herculean* combines a blistering pace with fringe science and myths reborn.

## From Reader Review Herculean for online ebook

### Linda White says

I love the Chess team series, so I had to check out this spin off. Jeremy does an awesome job of creating a new set of stories with some of the old characters from The Chess Team. The Herculean Society is still working to keep Hercules secrets but they find there are other things they can do to help keep an eye on what's happening within the underbelly of civilization.

Cerberus Group was once a Nazie soldiers personal Army to find and weaponize new biological finds. But this old Nazie is now trying to find the Well of all Monsters, from the old legends of Hercules travels and battles. The Herculean Society must stop them before they find a way to set loose the monsters onto the world.

The characters are easy to like and easy to hate, as Jeremy Robinson creates personalities with strengths and weaknesses for us to bond with and gives the bad guys the attributes we love to hate! This series will become one of my favorites, I can see that already!

### Reeda Book says

This was an action packed ride featuring Greek mythology, in particular, the labors of Hercules. This is a new series spinning off from the Jack Sigler series and features some of the characters in those books.

This one centers around the Herculean Society whose members are tasked from actually keeping some discoveries from becoming known to the world because it would bring more trouble than it is worth. Of course, it isn't fun if we don't throw in the bad guys, known as the Cerberus Group. Throw in some hybrids, a monster or two, a girl who is the last person on Earth that knows the Mother Tongue, (the oldest known language that has magical qualities), and some fun twists and turns, and you have a thrilling ride in the vein of Matthew Reilly and James Rollins.

I enjoyed the heck out of this one and was extra thrilled to see a character I love return in this book! I am super excited to see what happens next!

### Jordan Anderson says

I've been on a bit of a Robinson renaissance lately. After 5 new novels in 2018 alone, and my renewed fandom in his works after his newest *Alter*, it only seemed the right thing to go straight into another book I

somewhat glanced over previously.

Now, I originally had some slight doubts with this one, as I still haven't finished the original run of the *Chess Team* novels (and the other like 20 Robinson novels I *Still* haven't gotten around to reading) and I know a lot of what happens in the 4 I haven't read directly impacts the events of *Herculean*, but the good news is all those doubts can be swept aside.

As has seemed to be pretty much par the course with anything Robinson writes with Ellis, *Herculean* is a ton of fun, continuing many of the exploits of the original Chess Team, but also managing to be its own complete, standalone story.

And a good story it is. Sure some of the nonstop, over the top action that is usually in Robinson's novels is dialed back a bit, replaced with more history and ancient fictional characters, but that makes this a far more deep, compelling story, reminiscent and similar to many of James Rollins's *Sigma Force* novels.

Looking forward to *Helios* and, hopefully, more *Cerberus Group* novels on the near horizon.

### **Lyn says**

It is always great when Jeremy Robinson and Sean Ellis get together and write a new Chess Team adventure. It is even better when they write the start of a whole new series with an exciting new team,new adventures and a few familiar names!

The Herculean Society led by archaeologist George Pierce has to face the Cerberus group, a new and deadly enemy. George and his niece Fiona join with Felice Carter, Cintia Dourado,Augustina Gallo and a very mysterious warrior named Lazarus. Each has different knowledge and skill that will come together on their journey to stop Cerberus,find hidden artifacts and make an amazing discovery.

If you love thrills,action, mystery and danger you won't want to miss this book. It is the start of a fantastic new series.

### **Dustin says**

I loved this book, an offshoot of the Chess Team books, but with characters and a vibrancy all its own. I strongly suggest you read all the Chess Team books beforehand, but even if you don't, this is a sweet story (it'll make you want to read them after though, lol). Action, monsters, cool story lines. Read it!

### **Jonathan Dunsky says**

What if Hercules wasn't a mythical figure but an actual man who lived three thousand years ago and was a scientific genius, who learned how to modify his own genes to allow him to live for centuries, and to combine the DNA of different life forms to create new animals and monsters?

What if the Labors of Hercules, as told in the myths, in which Hercules encountered and fought various monsters, actually told of his interaction with some of these new, manufactured species?

And what if Hercules had created the Herculean society, a group of scientists, historians, and military experts with the express goal of hiding the secrets of history and science he had uncovered and make sure that they would never fall into the wrong hands?

And what if now, an international criminal organization called Cerberus, led by a maniac intent on learning the ancient secrets, was on the cusp of attaining control of the very secrets Hercules strove to hide, secrets that would give it control over life itself, allow it to create new strains of viruses and disease, to lay waste to much of humanity, if it so wished?

That is the premise of this fine adventure novel, written by Jeremy Robinson and Sean Ellis, and narrated by Jeffery Kafer.

The novel is a fast-paced, action-packed sci-thriller, full of gun fights, villains, monsters, biology, history, mythology, and history, all blended together into one hell of an enjoyable tale. The book made me feel like learning more about Hercules and Greek Mythology. And Kafer's narration was solid and fit the narrative well.

This isn't great literature, but it is well-written, it moves very quickly, and I had a very good time with it.

### **Pixie says**

Herculean by Jeremy Robinson and Sean Ellis is an action packed ride through Greek mythology centering around the great hero Hercules and the task of cleaning up after his exploits. If you are into books about secret societies as well as mythology I highly recommend you give this a read, it takes the old tales and gives them a fresh new spin that will peak your curiosity and leave you reading late into the night. I cannot wait for

the next installment in this exciting new story line.

### **Steve says**

So many secrets finally revealed! Alexander might be gone, but his legacy lives on—along with so many mysteries. This book brings answers to questions left open in earlier Chess Team books. It also sets the foundation for a powerful new parallel series with thrilling potential.

### **Warren Thoms says**

I was looking for a lot more from this book. It was a good story but a book that I could put down at anytime. There was nothing that really gripped me to want to keep reading other than wanting to finish the book. I am not sure if I will read the second book in the series.

### **Kelly says**

Thrill ride! Jeremy Robinson doesn't disappoint, I'm beginning to think he simply can't. I loved this new series start, a spin-off of the Chess Team books. The Herculean Society has a new head, Fiona is back, and several other characters make very welcome appearances. Loved the new spin on Hercules' labors. I can't wait for more.

### **Geoff says**

4.5 stars.

Another brilliant read by the authors.

Love the new direction for some old characters, and it's looking like this is ANOTHER series I have to read.

\*sigh\*

Recommend you try some Robinson/Ellis.
