### **Deliasue says**

Takes place in Arizona during the Indian uprisings. Bounty Hunters, Indian slaughters, Scalp hunting, and Cole is in the middle of it. He is hurt while his woman and child is killed and he gets away to try to heal but now he wants revenge. I don't usually read gruesome books but this one by Robert Broomell is a on the edge of your seat book.

### **Casey says**

Well written, full of action and the characters were consistent in their actions.  
Lots of activity and an ending I can live with!

**RESPECT RESPECT**

A family on their way to start a new beginning. While they were camped, they were attacked and his entire family slaughtered. As he stood looking at the bodies of his family, a group of Indians emerged from the surroundings. They looked around and saw what had happened, they took him with them to their village where he was adopted by a war Chief Loco. His life was forever changed and he loved it. It was a life of purpose and discipline, respect for the land. This has a lot action,, history and you won't be disappointed. Keep your campfires low and your head even lower...???
