Blue Bloods have special characteristics. They stop aging at a random point in their lives, and they have a unique ability ranging from telekinesis to fire wielding. There are two different organizations of Blue Bloods. The good one is the Protectors and the evil one is the Destroyers. My name is Waves Calden. Join me as I recount joining the Protectors and the struggle to save the country.

Okay, I liked it, but some of the language and the wording, kinda came off as stilted a bit. The overall story was really good though.

Disclosure: I was given my copy of this book by the author as a review copy

I enjoyed this novel, although it is not something I would usually find myself reading.

I would say this is very much a 'boys book', comparable to comic books or graphic novels, and very much in its format, put me in mind of x-men:

A select few of the human race are born with Blue Blood, a result of which as they go through adolescence, they develop special abilities.

It is a classic tale of good versus evil, with our heroes of Kai and Waves learning the way of life of a protector from an older, wiser mentor. Helping them to develop their unique powers and hone their abilities so they will be prepared and ready to fight when the time comes to stand up to the destroyers, the blue bloods whose to use their abilities in the purpose and pursuit of evil.

I very much enjoyed the historical references and the famous figures from all throughout time that have been Blue Bloods, fighting to protect or destroy the human race.

There is a promise of future novels, to develop a series of Blue Blood protector novels, which is an exciting prospect and I very much look forward to future Novels.

Jeremy Sandlin Has captured history and imagination to create an underbelly of heroes and villains that fight

for the planets future, hidden away from the human race.

I would recommend this as a young adult novel and to any comic book or graphic novel fan.
