The first time I saw her I knew she was mine.

I have everything I want. That's the life of a billionaire. I see. I want. I get. So, of course, when the woman of my dreams—the fiery redhead with the face of an angel and balls of steel—comes stomping into my world, I take action. I know how to get things done.

She may hate me for stealing her away. But a man has to do what a man has to do. Just like I'm going to take it all—everything she has to give. Including the one thing she's never given another man.

And in return I'll give her even more. The life she deserves. Children...

My heart and soul.

Mine. Jordan is mine.

And I am hers.

Warning: Open this book and escape into a world where a billionaire (with a to-die-for body, of course) falls in love in an instant and sweeps his (lucky) woman off her feet...and into the life of her dreams! But be warned--this (dirty) uber-hot, sticky-sweet story of (totally ridiculous) insta-love and baby-making may inspire you to wake your partner, climb onboard, and get things done yourself.

Ah, the power of fiction...

### Chantal ❤️? says

Short hot story of the good girl after she found out that her fiancé is a lying cheating bastard, finds the rich hot guy of her dreams.

The hero is a hard working rich guy who has enjoyed fruits of his labor but when he see his one little red head spitfire, he is on the hunt.

He wants it all.

The whole package but will she be on board?

He gets her to his private island where they must find a way to meet in the middle.

This was a very written story that made me smile with how obsessed the hero was with the heroine.

Wow I just love that!

This book worked for me and I think it's the kind of story that one can quickly read after a disappointing book.

Got me out of my funk after my last book.

Got to love the upbeat happy story.

I can't believe he made her wait! Ah man I don't know how he did that.

A good read solid 4.5.

Worth a read and a reread.

Safety: hero is little bit of a manwhore, heroine is a Virgin, no drama, no pushing or pulling.

### Emily says

Grayson Parker is a billionaire who can have any woman he wants, while he listens to his friend rant about his co-worker is his ice cold to everyone, he gets a shock. A hellcat storms into the bar and does something that peaks Grayson's interest.

Jordan can't believe her fiance, well ex, cheated on her. To say she is heartbroken would be a lie, but what's a girl to do. When Grayson makes his intent known, Jordan isn't so sure she wants another man in her life. Grayson though plans to convince she is his heart and soul.

This was fun, had some holes in it that didn't flow right. If you're just looking for a alpha male insta love type

story this is one to pick up.

2.5 Insta whatever stars.

I Just did not get it. Did not see what he saw in her at all. At least not in one day. Too fast and I like fast. Then we jump ahead 6 months. I hate that shit!

I am loving Alexa Kaye's books especially when I want a quick, hot as hell, insta-love book because she always delivers. Grayson Parker is a rich, successful businessman who could have any beautiful woman he wanted and he always gets what he wants. His father was a migrant farmer and he knows what it's like to struggle so he worked his ass off to give his parents a better life in their retirement. His best friend, Colbe is the head of one of his departments at Parker Enterprises and he's always talking about a new employee of his who is a horrible bitch. While he and Colbe are at a bar having drinks he sees a gorgeous woman walk in, punch a man in the face, down two shots of tequila, and then leave. He is shocked when Colbe tells him that she was the bitch he has been talking about all this time. Jordan grew up in Utah in a Mormon fundamentalist community and she had no interest in becoming one of many wives to some man. Her boyfriend, Nick that she had been secretly dating for three years lived there too and he also was against a polygamist lifestyle. The two of them left Utah and moved to Michigan but kept separate apartments because she was a virgin and planned to stay that way until she married Nick. She found out Nick was cheating on her so she followed him to the bar he was at with his other girlfriend and punched him in the face. When she gets home she realizes she's not really upset about Nick but she's mad and pretty soon she's gonna be homeless because she was supposed to be married in two weeks and she gave notice to her landlord. The next day while driving to work she's about to enter the parking garage for Parker Enterprises when her car suddenly stalls while she's blocking the entrance. Grayson can't believe his luck when he realizes the car stuck in front of him is Jordan's so he gets out and helps her. When he tells her that her motor is shot she almost passes out so he carries her up to his office. He asks her to go out to dinner with him and she accepts but she doesn't expect him to take her on his jet to his own private island. Wow, this review is way too long so I apologize and I'll end it now.

Cute story of billionaire and virgin. There was a part there that glossed over six month to when they got married and had sex for the first time. I just wish there was some little bit of detail of those six months.

Insta love is okay sometimes but this was kind of overwhelming. They did not have any chemistry outside of lust. There was no foundation for his less than 24 hour love for her.

I feel like there were a few quick google searches that made up the h's history of being in the FLDS church. I've read books where the authors had actual people that left the church help her with her characters. I've watched documentaries on the oppression these women face and the lives they lead when and IF they can escape. This girl does not match what she should have been. If she spent her whole life in this community and then escaped, it wouldn't be peaches and sunshine. Maybe it's just me but it just did not make sense.

Another thing that bothered me was the sentences that had (so many) parentheses. I mean... Commas work if you're describing something. "..(well fitted) suit" doesn't need parentheses. "... well fitted suit," will do just fine.

OMG, Tamika! I don't remember this one at all! I mean, I know I read it cause it's on my list of "books read" but after that... blank slate, lol.

And that tells you about this one, doesn't it?

## **Bookloverme says**

It's a nice short story about finding the right one for you. It's not about how long you know each other. If you find the one, cherish her or him and never let go.

The story is about Grayson and Jordan.

Grayson is a rich man. He owns Parker Enterprises and a contracting company. He's happy but there's something missing in his life.

He's at the clubhouse with his friend the first time he saw Jordan. And it's the time she punched her now ex-fiancé who's with another woman.

He followed her after she left and tried to comfort her. She tried to hit him when she felt his hard-on thinking he's just taking advantage of her. She later found out he's her boss's boss. She's new to the company and didn't know he's the Grayson Parker.

Grayson is a good man. He may be a player but he's done with that and I never felt the manwhore vibe. In fact, he's so obsessed with her that he'll do everything to have her.

It has a nice epilogue. (view spoiler)
